

Overview

BigAnt Messenger Server is a secure and stable messaging application designed to provide efficient and private communication over networks of any size.

What can BigAnt do for you?

- No more MSN Messenger, no more ICQ, get rid of these efficiency killers from your company now to boost office productivity.
- Particular designed for enterprise use. No matter the size of your company, small or large, local or world wide. No limit of online users.
- Faster than e-mail, sending all sorts of messages or files instantly to your office colleagues.
- Absolutely no limitations of size and type for the files you would like to transfer, send any message or file whether your colleagues are online or not.
- Enjoy maximum security as BigAnt encrypts all data transmitted.
- No matter where you are, Paris or New York? There is only one click away between you and your colleague. Breaking the distance barrier only with BigAnt.
- A powerful client-server easy for maintenance while keeping the setup and other options to an absolute minimum, requiring minimum intervention from an IT staff.

To install BigAnt Server program

1. Launch BigAntServer_Enu.exe setup file (*).
2. Follow all instructions in the Setup Wizard.
3. After installation you can launch BigAnt Messenger from **Start Menu -> Programs -> BigAnt Server-> BigAnt Console**

(*) The filename may have a different name depending on custom installation package or other related settings.

To uninstall BigAnt Server program:

To remove BigAnt Messenger's program files from your computer, do the following steps:

1. Click **Add/Remove Programs** icon in **Control Panel** folder.
2. In the window select BigAnt Messenger and click **Add/Remove** button.
3. Follow all instructions of the Setup Wizard.

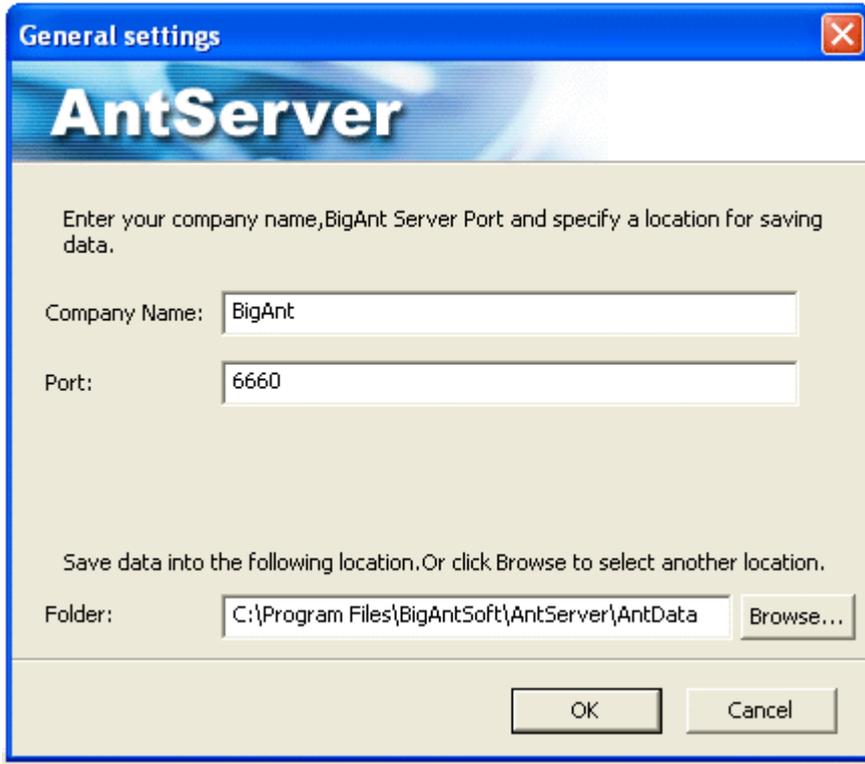

Update BigAnt Server program

Check for latest version for BigAnt Server program on our website or contact info@bigantsoft.com

General Settings

Click **Options** on BigAnt Server Console menu,select **General Settings** from the pop-up menu.

This page is for you to enter your company name,port and specify a location for saving data.

The screenshot shows a dialog box titled "General settings" for "AntServer". The dialog has a blue header with the "AntServer" logo. Below the header, there is a text prompt: "Enter your company name, BigAnt Server Port and specify a location for saving data." There are three input fields: "Company Name:" with the value "BigAnt", "Port:" with the value "6660", and "Folder:" with the value "C:\Program Files\BigAntSoft\AntServer\AntData". A "Browse..." button is next to the folder field. At the bottom of the dialog are "OK" and "Cancel" buttons.

- **Company:** Specify the company name here. For example, BigAntSoft
- **Port: 6660** (If this port number doesn't conflict with any currently running applications or services, please leave as default. A BigAnt Client program uses this default port number as well. If the Administrator decides to use a different port number to run the server, all client programs should be reset to use the same new port number)
- **Data location:** History message and other data will be saved in the following location. To save data in a different location, click Browse, and then select the location.

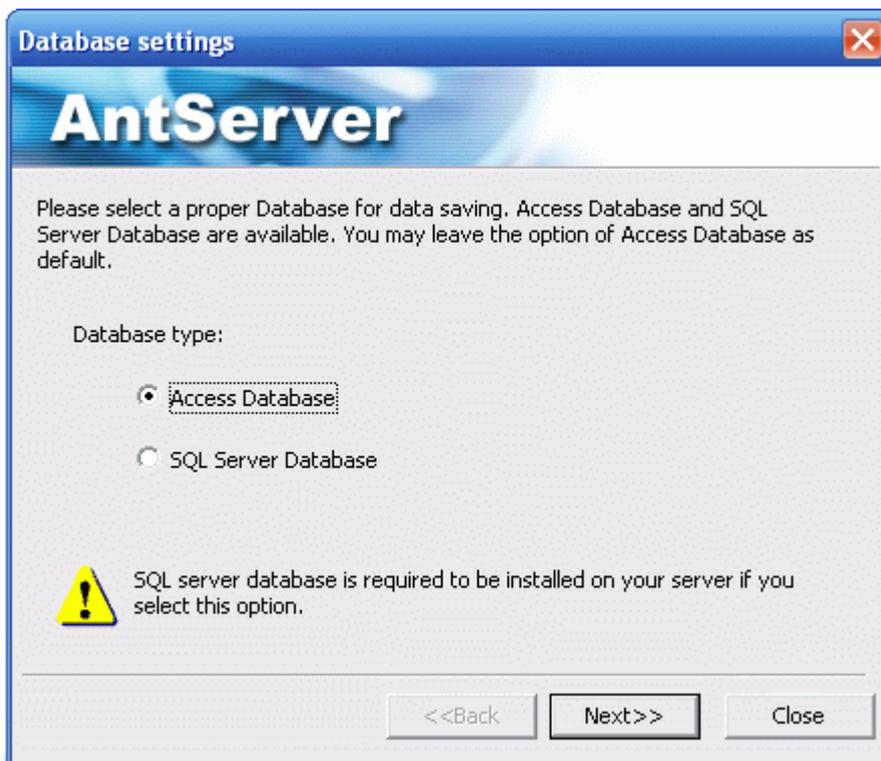

Database Settings

Since BigAnt Server logs and archives all message history and user conversations, it needs a database server to store all the data, such as user account information, user groups, message history, etc.

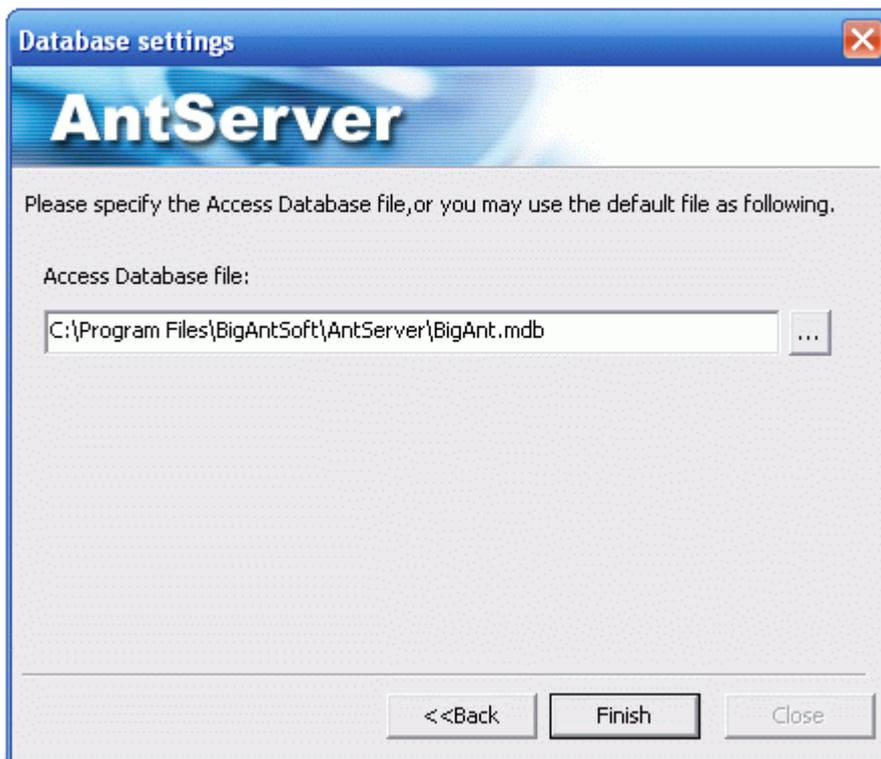

Click **Options** on BigAnt Console menu,select **Database Settings** from the pop-up menu or click .

You can choose from 2 available databases: Access and SQL database

Access Database

You need to specify the name and location of the Access database.

SQL Database

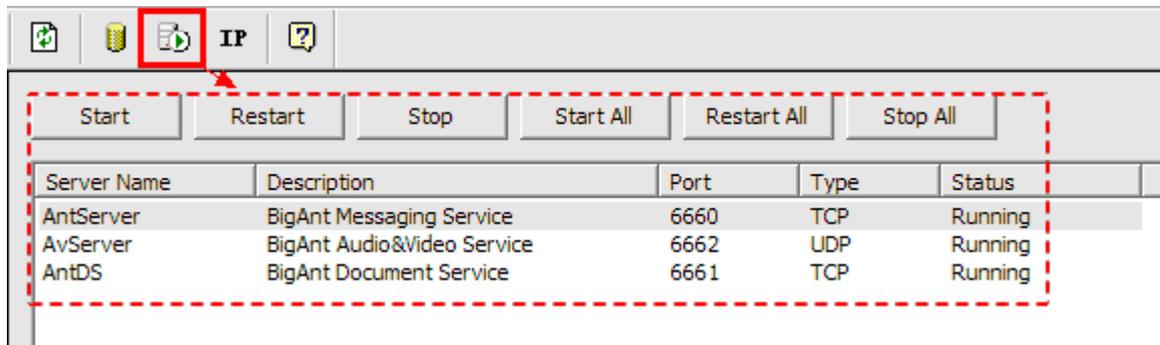

SQL Server should be preinstalled and launched on your server computer. You need to specify the name of the server and database, enter Account and Password to create a BigAnt Server database on the SQL server.

BigAnt Server Control

Server Control

1. Click **Server/Run Service Control** from main menu or click the  to show Server control page.

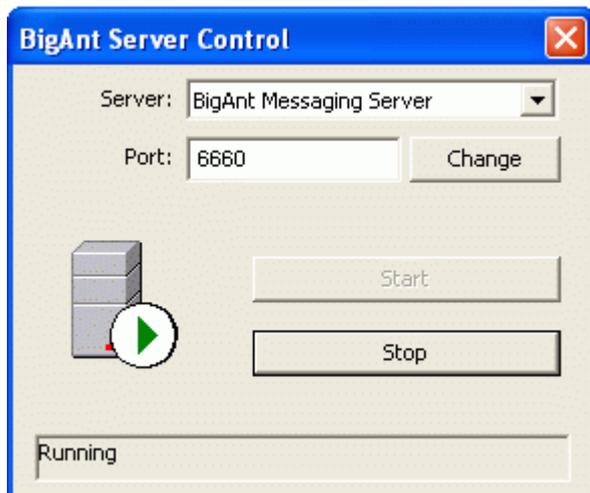

2. Service name, port and protocol

Service	Port (Default Value)	Description	Protocol
AntServer	6660	for instant messaging	TCP
AVServer	6662	for voice and video call	UDP
AntDS	6661	for document management	TCP

Port: If this port number doesn't conflict with any currently running applications or services, please leave it as default. A BigAnt Client program uses this default port number as well. If the Administrator decides to use a different port number to run the server, all client programs should be reset to use the same new port number)

Change Port: Enter a new port in the required field, Click **Change** button.

3. Start / Stop BigAnt Server

- Click to select a service, click **Start** button to run the service

- Click to select a service, click **Stop** button to stop the service
- Click to select a service, click **Restart** button to resart the service
- Click **Start All** button to start all the three service
- Click **Stop All** button to stop all the three service
- Click **Restart All** button to restart all the three service.

4.Show BigAnt Server IP

Click **Tools/Server IP** on main menu or click the  to show BigAnt Server IP.

System requirements

***System requirements for BigAnt IM server.**

BigAnt Messenger Server supports MS Windows XP/2003/Vista. MS Windows Server 2003. The following minimum system configuration is required:

- CPU: P3 (physical double core or specialized server is recommended is recommended)
- Free disk space: 500 MB or above
- RAM: 512MB (or higher recommended)
- Active Directory (LDAP) presence (optional)
- SQL Server: SQL SERVER2000 or SQL Server 2005(optional)

End-User License Agreement (EULA)

Important! Read the following terms carefully before installing, copying and/or using the product. Installing, copying or using the product indicates your acceptance of these terms.

This End-User License Agreement ("EULA") is a legal agreement between you, the end user of the license rights granted herein, and BigAntSoft governing the use of the server-side software (SERVER SOFTWARE) and client-side software (CLIENT SOFTWARE) both mentioned below as SOFTWARE accompanying this EULA, including any and all associated media, printed materials, and "online" or electronic documentation protected by copyright laws. By installing, copying, or otherwise using the SOFTWARE, you agree to be bound by the terms of this EULA. If you do not agree with the terms of this EULA, do not use the SOFTWARE. You may obtain a refund of the amount you originally paid if you:

- Do not use the SOFTWARE, and
- Return the SOFTWARE, including all of the above-mentioned documentation, media and packaging, with the proof of payment, to the place where you bought the SOFTWARE, within the term provided by the law of the country and the return policy of the location in which you purchased the SOFTWARE.

1. Grant of License

1.1 Subject to your compliance with the terms of this EULA, BigAntSoft grants you, the end user, a non-exclusive license enabling you to use the SOFTWARE.

1.2 All conditions stated below apply both to the SOFTWARE as a whole and to all of its separate components.

2. License

2.1 BigAntSoft represents, warrants and guarantees that it has the full right, power, legal capacity, ability and authority to license and distribute the SOFTWARE, including all the images, photos, animations, audio-video components, sound, text and "applets" incorporated into the SOFTWARE, as well as the accompanying printed materials and all of the SOFTWARE copies.

2.2 The SOFTWARE contains valuable trade secrets and confidential information belonging to BigAntSoft and is protected by copyright, including, without limitation, by United States Copyright Law, international treaty provisions, and the applicable laws of the country in which it is being used. Any use of the SOFTWARE outside of or in contravention of the terms and conditions of this EULA shall constitute a breach of BigAntSoft's intellectual property rights and shall give cause for the revocation of all rights to use the SOFTWARE granted to you under this EULA.

2.3 You may make a one-time permanent transfer of this EULA and SOFTWARE only directly to an end user/company. This transfer must include all of the SOFTWARE (including all component parts, the media and printed materials, any upgrades and LICENSE KEY file (described in article 6.1) for the purchased SOFTWARE). Such transfer may not be by way of consignment or any other indirect transfer. The transferee of such one-time transfer must agree to comply with the terms of this EULA, including the obligation not to further transfer this EULA and SOFTWARE. You must uninstall the SOFTWARE from your computers or from your Local Area Network in the case of such SOFTWARE transfer.

3. Using the SOFTWARE

3.1. In the case of a stand-alone installation you may not install the SERVER SOFTWARE on any other computers except a single installation on a company's server computer or your home computer.

3.2. You may install and use the CLIENT SOFTWARE simultaneously on a limited number of computers at the same time. The number of CLIENT SOFTWARE that supported by the SERVER SOFTWARE is provided to you by a LICENSE KEY file.

4. Dual-Media SOFTWARE

4.1 You may receive the SOFTWARE on more than one medium, including downloads over the Internet. Regardless of the number of media you receive, you are only licensed to use one copy of the SERVER SOFTWARE and a limited number of the CLIENT SOFTWARE supported by your LICENSE KEY file in accordance with Section 3 of this EULA.

5. Redistribution of the SOFTWARE

5.1 The SOFTWARE trial version may be freely distributed, with exceptions noted below, provided the distribution package is not modified. No person or company may charge a fee for the distribution of the SOFTWARE without written permission from BigAntSoft. Trial version may not be bundled or distributed with any other package without written permission of BigAntSoft. You may not sell or grant an access to third parties such as LICENSE KEY file (except as described in article 2.3), rent, lease, or lend the SOFTWARE.

6. Limitations

6.1 Purchase. You acknowledge that the SOFTWARE is protected from unauthorized copying and unlimited use. You may not be able to exercise your rights to the SOFTWARE under this EULA unless you purchase your copy of the SOFTWARE. When you purchase the SOFTWARE you receive an unique LICENSE KEY file within 24-72 hours after your payment of the SOFTWARE is transferred. A LICENSE KEY file is provided by BigAntSoft and includes a number of the CLIENT SOFTWARE supported by your single installation of the SERVER SOFTWARE. BigAntSoft agrees to provide all the instructions and step-by-step information on how to set and use a LICENSE FILE in the SOFTWARE.

6.2 All usage terms and limitations governing the use of the SOFTWARE are stated in Section 3 of this EULA, unless otherwise stipulated in a separate agreement with BigAntSoft.

6.3 You may not perform or make it possible for other persons to perform any activities included in the list below:

6.3.1 Disassemble or decompile (i.e. extract the source code from the object code) the SOFTWARE (applications, databases, and other SOFTWARE components), except, and only to the extent, that such activity is expressly permitted by applicable law notwithstanding this limitation.

6.3.2 Modify the SOFTWARE, including making changes to the object code of the applications and databases contained in the SOFTWARE other than those provided for by the SOFTWARE and described in the documentation.

6.3.3 Transfer any rights granted to you hereby and other rights related to the SOFTWARE to any other person, except as described in article 2.3.

6.3.4 Make it possible for any person not entitled to use the SOFTWARE and working in the same multi-user system as you to use the SOFTWARE.

7. Support Services

7.1 BigAntSoft will provide you with support services related to the SOFTWARE ("Support Services"). BigAntSoft retains the right to make changes to its Technical Support Policy without prior notice.

7.2 Any supplementary software code provided to you as part of Support Services is to be considered as part of the SOFTWARE and subject to the terms and conditions of this EULA.

7.3 To be eligible for Support Services, you are required to provide BigAntSoft with information about the characteristics of network settings and computer, as well as standard personal details including your name, company name (if applicable), address, phone number and e-mail address.

7.4 BigAntSoft may use the above-mentioned information for its business purposes, including, but not limited to, product support and development, provided that BigAntSoft does not utilize such information in any form that personally identifies you.

8. Not for Resale Software

8.1 If the SOFTWARE is labelled "Not for Resale" or "NFR", then, notwithstanding other sections of this EULA, you may only use such SOFTWARE for demonstration, verification or testing purposes.

9. Software for Trial Purposes

9.1 If the SOFTWARE is labelled "Try&Buy", "Trial" or "Demo", then this section shall apply until such time that you purchase a license for the full retail version of the SOFTWARE. You acknowledge that the SOFTWARE has limited functionality and/or functions for a limited period of time. The SOFTWARE is licensed on an "as is" basis, solely as a demonstration model. If the SOFTWARE is a timeout version, its functionality will be disabled after a designated period of time following the installation, this period being specified in the SOFTWARE. Upon such timeout date, the license hereunder shall be terminated, unless extended by BigAntSoft upon your purchase of a full retail license from BigAntSoft.

10. Upgrades

10.1 If the SOFTWARE is labelled as an upgrade, you must be properly licensed to use a product identified by BigAntSoft as being eligible for the upgrade in order to use the SOFTWARE.

10.2 The SOFTWARE labelled as an upgrade replaces and/or supplements the product that formed the basis for your eligibility for the upgrade.

10.3 Once you have installed the upgraded product, your previous EULA is considered null and void.

10.4 You may only use the resulting upgraded product in accordance with the terms of the EULA supplied with the product.

10.5 You acknowledge that any obligation BigAntSoft may have to support the version of the SOFTWARE being upgraded shall end upon the availability of the upgrade.

11. Termination

11.1 Without prejudice to any other rights, BigAntSoft may terminate this EULA if you fail to comply with the terms and conditions of this EULA.

11.2 In such an event, you must destroy all copies of the SOFTWARE, all of its component parts and uninstall the SOFTWARE.

12. Warranties and Indemnifications

12.1 BigAntSoft warrants that the media on which the SOFTWARE is furnished will be free from defects in materials and workmanship under normal use for a period set by the legislation of the country in which you purchased the SOFTWARE starting from the date of purchase or distribution. If the SOFTWARE was purchased in the Russian Federation, this period will constitute 60 days starting from the date of purchase or distribution.

12.2 In all other respects, the SOFTWARE is supplied "as is". BigAntSoft does not guarantee that the SOFTWARE will carry no errors, nor will it take on any liability for damages, either direct or indirect, including, without limitation, damages for loss of business profits, business interruption, loss of business information, or any other pecuniary loss resulting from the use of the SOFTWARE, or damages caused by possible errors or misprints in the SOFTWARE.

12.3 BigAntSoft does not warrant that the SOFTWARE will meet your requirements or that the SOFTWARE will function properly when used in conjunction with any other software or hardware.

12.4 Except as expressly provided herein, BigAntSoft makes no other warranties, either expressed or implied, regarding the SOFTWARE, its merchantability, or its fitness for any particular purpose, and the entire risk as to the quality and performance of the SOFTWARE lies with you.

12.5 In any event, BigAntSoft's sole obligation or liability under this EULA, regardless of the nature of the events that resulted in such an obligation or liability, shall not exceed the purchase price originally paid for the SOFTWARE.

13. Export Rules

13.1 The SOFTWARE shall not be exported or re-exported in violation of any export provisions of the country, where the SOFTWARE was purchased, or any other applicable legislation.

14. Governing Law

14.1 If the SOFTWARE was purchased in the United States, Canada, Mexico, Japan or Taiwan, this EULA shall be governed by and construed in accordance with the substantial laws in force in the courts of Santa Clara County, State of California, United States of America.

14.2 If the SOFTWARE was purchased in Austria, Belgium, Denmark, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Portugal, Spain, Sweden, the United Kingdom, or any other member state of the European Union that is not mentioned in article 14.3 or 14.4 of this EULA, or in Switzerland, Norway, Iceland or Liechtenstein, this EULA shall be governed by and construed in accordance with the substantial laws in force in the courts of Amsterdam, the Netherlands.

14.3 If the SOFTWARE was purchased in Russia, Byelorussia, Kazakhstan or any other country of the CIS, except for Ukraine and Moldova, this EULA shall be governed by and construed in accordance with the substantial laws in force in the courts of Moscow, the Russian Federation.

14.4 If the SOFTWARE was purchased in Albania, Bosnia & Herzegovina, Bulgaria, Croatia, Cyprus, the Czech Republic, Hungary, Israel, Macedonia, Malta, Poland, Romania, Slovakia, Slovenia, Turkey, Yugoslavia (Serbia and Montenegro), Ukraine or Moldova this EULA shall be governed by and construed in accordance with the substantial laws in force in the courts of Moscow, the Russian Federation.

14.5 In the cases described in articles 14.1-14.4, this EULA will not be governed by the conflict of law rules of any jurisdiction or the United Nations Convention on Contracts for the International Sale of Goods, the application of which is expressly excluded.

14.6 If the SOFTWARE was purchased in a country other than the countries specified in articles 14.1-14.4, this EULA shall be governed by and construed in accordance with the substantial laws of the country in which you purchased the SOFTWARE.

1. **Purchasing and Payment Methods**

We accept several types of payment:

- Credit cards via Online/Phone/Fax
- Mail / Check / Money Order
- Wire / Bank transfer
- Purchase Order

5. **Software Delivery**

Payments are processed in real time when the order is placed. You will receive license and download instructions via email once your order has been authorized.

User Management Overview

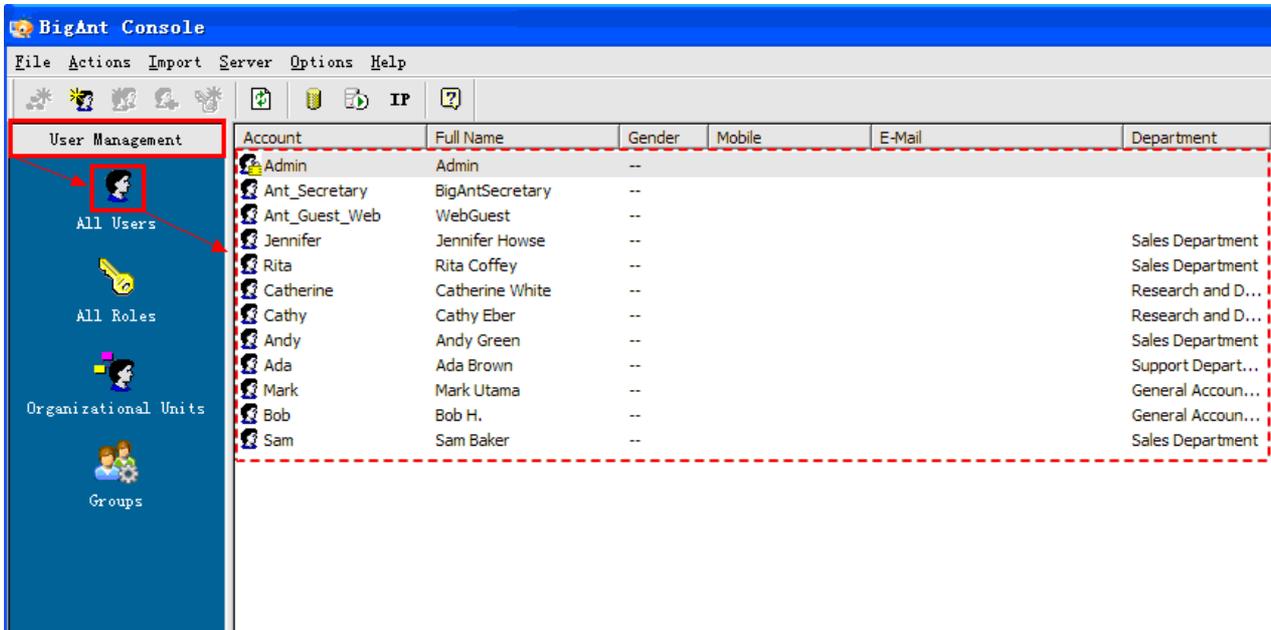

The User Management section of the BigAnt Server Console is for managing Organizational Units, Branches, Groups and User Accounts on the server. You can create an Organizational Unit tree in a clear view. An Organizational Unit is a container that stores Branches, Group description and User Accounts.

There is a built-in Organizational Unit in the server. It cannot be moved or deleted and it is used as the default container. All new user accounts are added to this Organizational Unit by default. You can move one or more users from one Organizational Unit to another and change your IM workspace structure at any time.

Select the **User Management** item in the left tree to switch the view to the User Management.

View all users

Select **All Users** from the User Management on the left pane. The result list displays the list of users that are currently assigned to the organizational unit.

The screenshot shows the BigAnt Console interface. The left-hand navigation pane is titled 'User Management' and contains several options: 'All Users' (highlighted with a red box and a red arrow), 'All Roles', 'Organizational Units', and 'Groups'. The main content area displays a table of users. The table has the following columns: Account, Full Name, Gender, Mobile, E-Mail, and Department. The data rows are as follows:

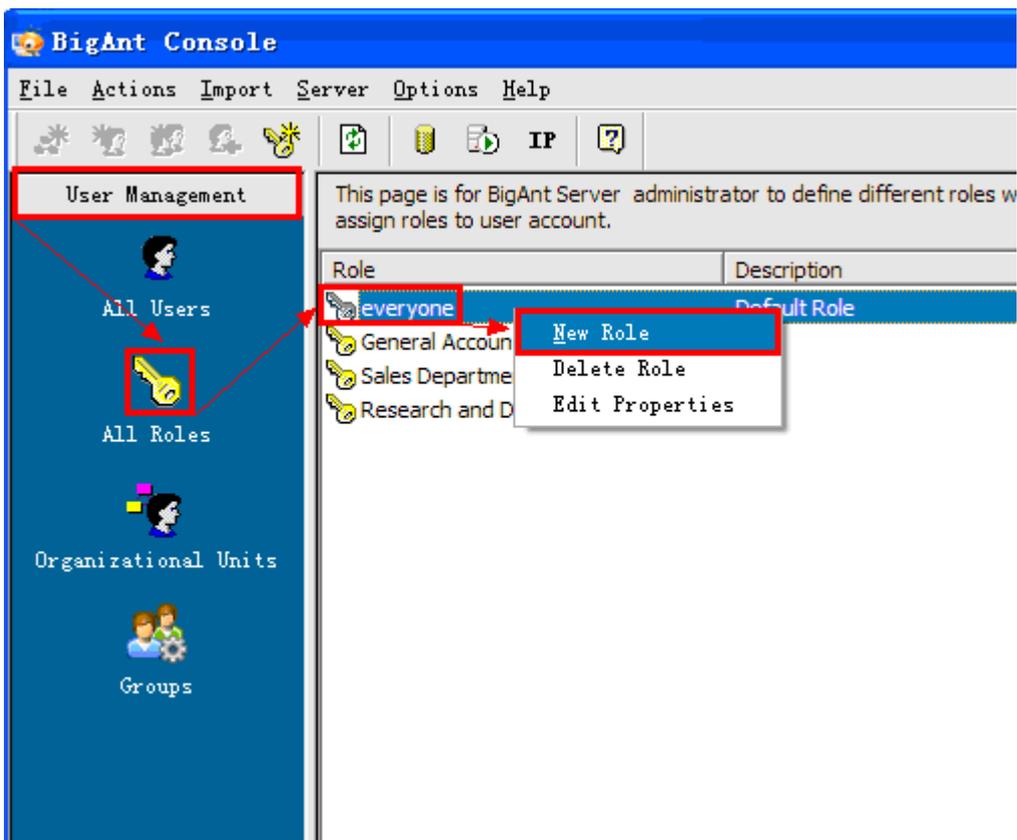

Account	Full Name	Gender	Mobile	E-Mail	Department
Admin	Admin	--			
Ant_Secretary	BigAntSecretary	--			
Ant_Guest_Web	WebGuest	--			
Jennifer	Jennifer Howse	--			Sales Department
Rita	Rita Coffey	--			Sales Department
Catherine	Catherine White	--			Research and D...
Cathy	Cathy Eber	--			Research and D...
Andy	Andy Green	--			Sales Department
Ada	Ada Brown	--			Support Depart...
Mark	Mark Utama	--			General Accoun...
Bob	Bob H.	--			General Accoun...
Sam	Sam Baker	--			Sales Department

Role Manager

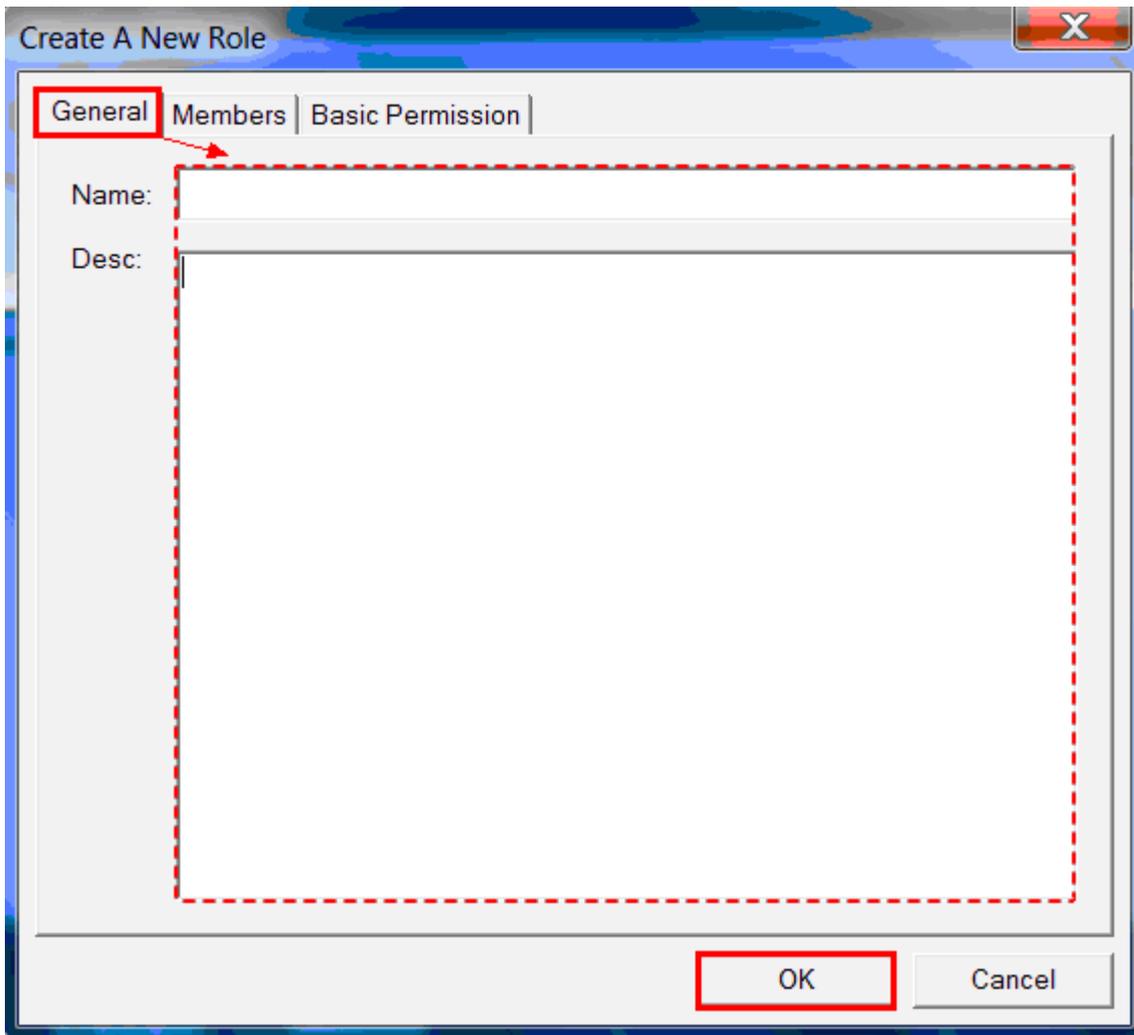

The Role feature is designed to give a user account the permissions to send bulletin message to whole company or selected groups or users, or limit the file size that he is allowed to send to other contacts, or send messages to users from selected organizational units and view them in contact list. Select **All Roles** from the **User Management** on the left pane. The right pane displays the list of all existing Roles.

Create a new Role

To create a new Role, switch to **All Roles** on left pane, right click on blank space in right side, and select **New Role** from pop-up menu.

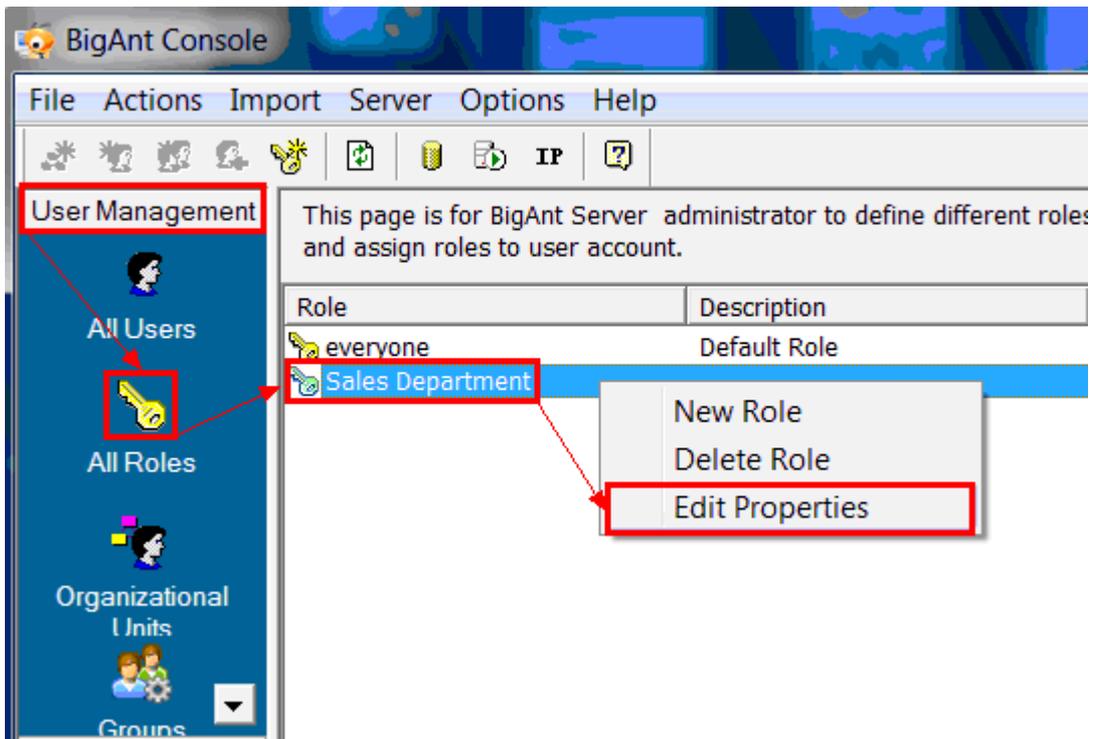

Enter a Role name and description in the Create a New Role page, Click **OK** to exit.

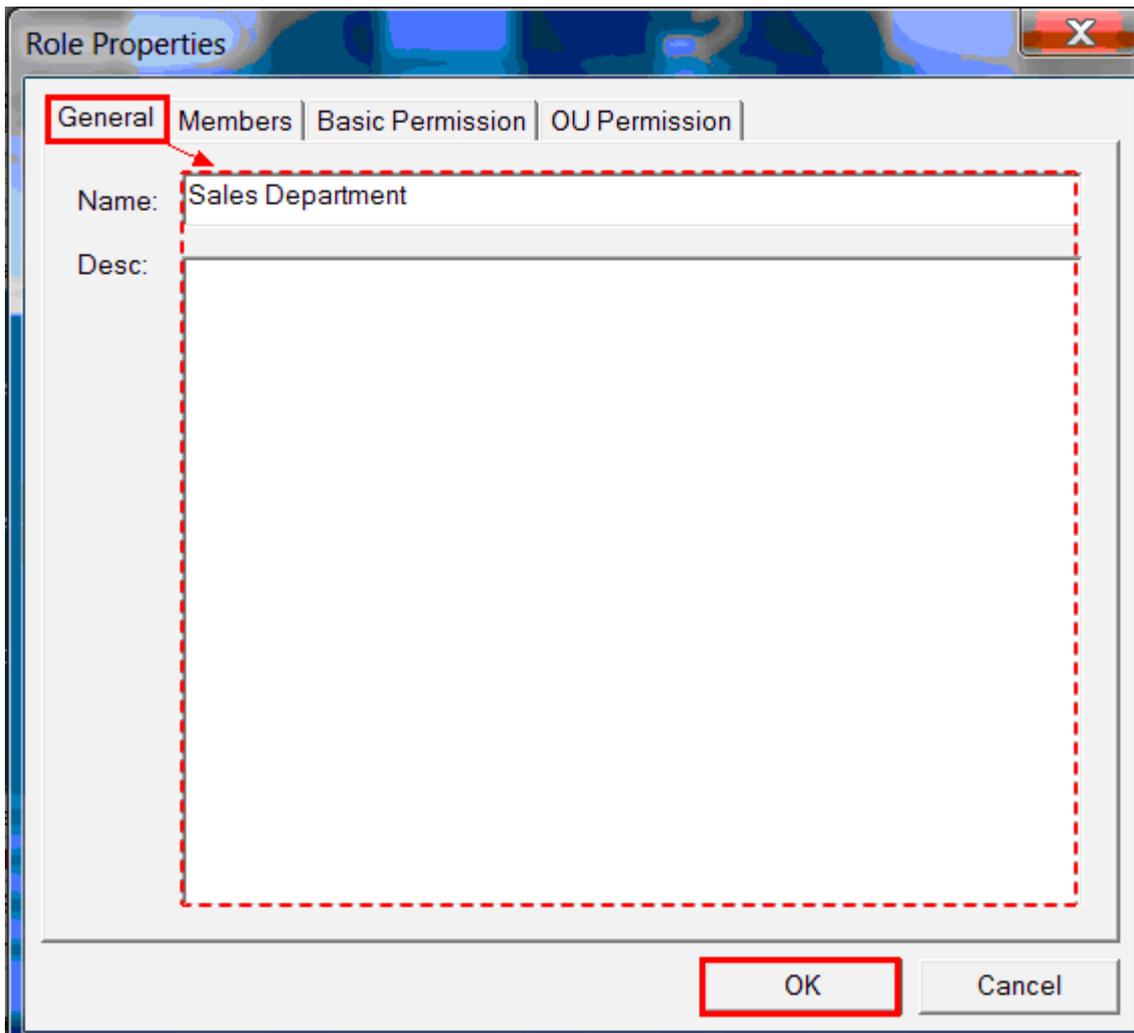

Edit an existing Role

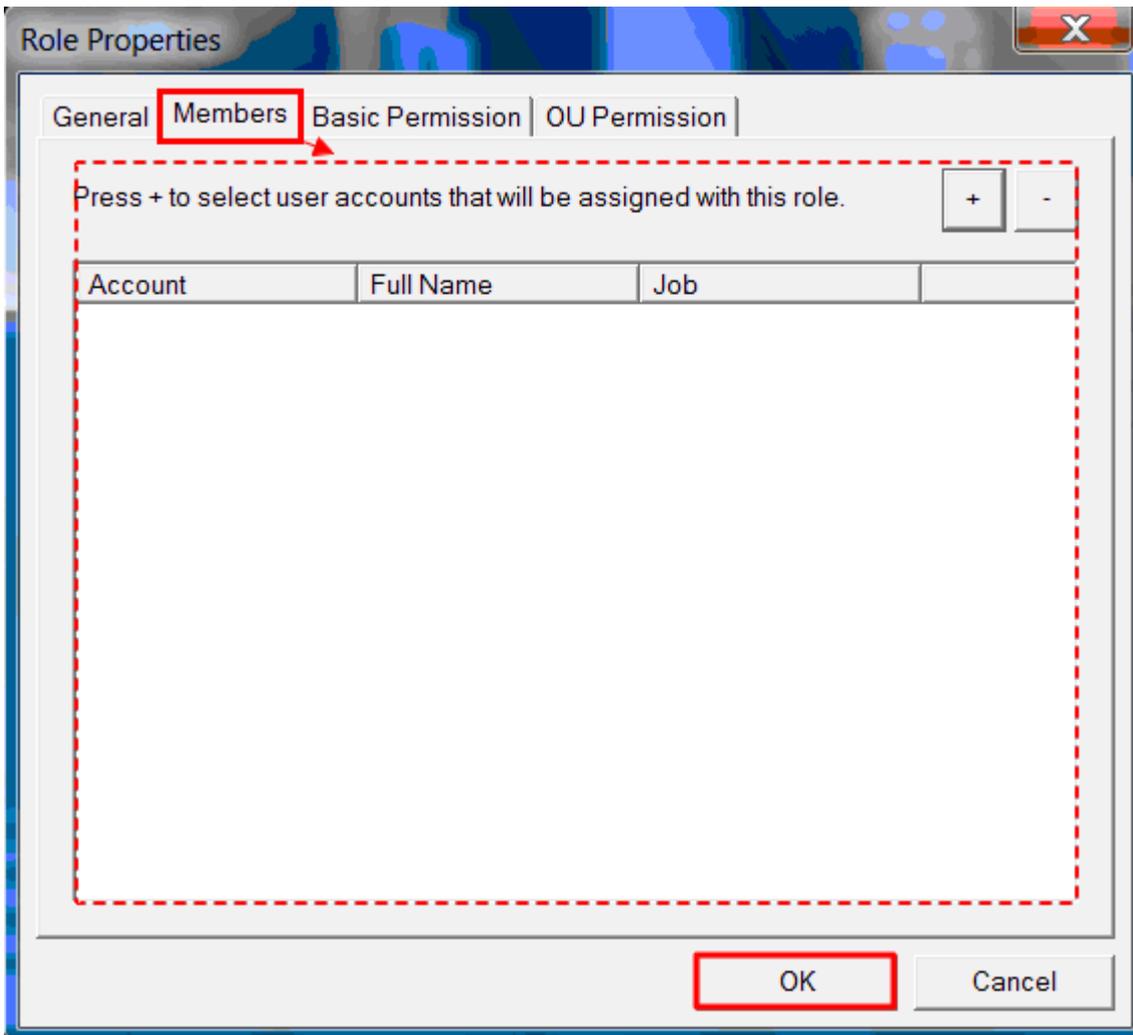

Select and right click an existing Role, select **Edit Properties** from pop-up menu.

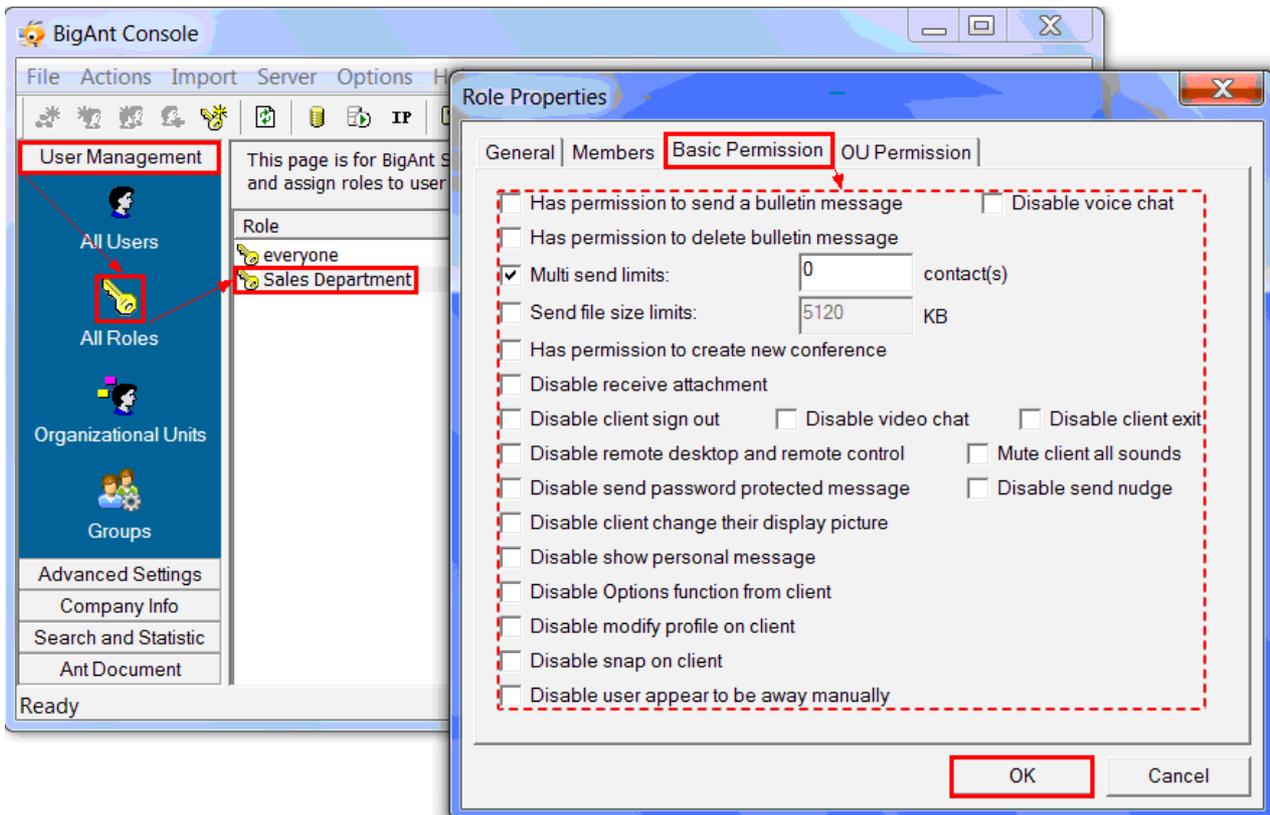

General: Enter a Role name and its description if there is any update.

Members: click + to select and add available user accounts, the settings in the Role will be applied to all the selected users.

Basic permission:

Has permission to send bulletin message: The user accounts belong to this Role will have right to send bulletin message to company, group or selected members

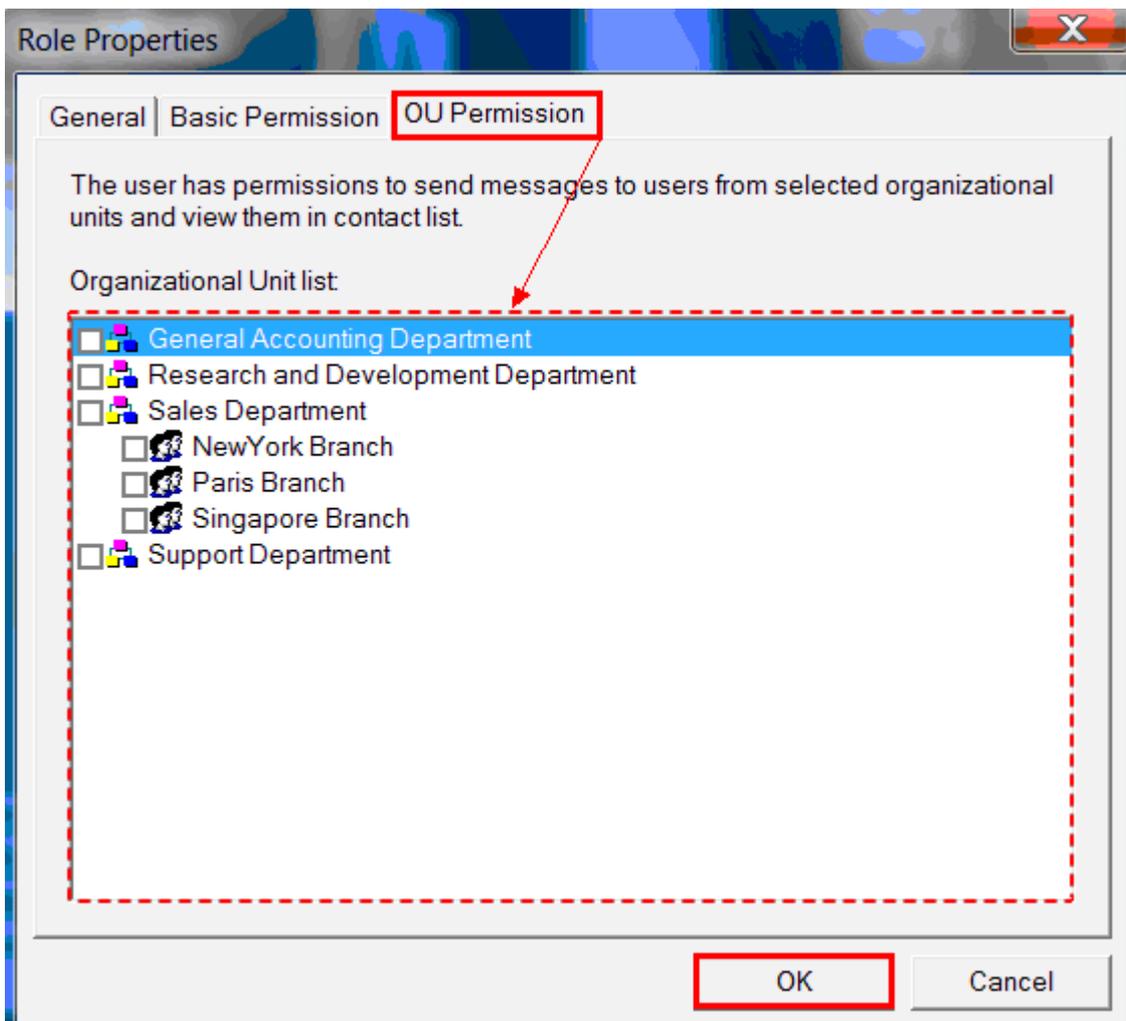

Multi send limits: Specify how many receivers you can send the same file at one time.

Send file size limits: Specify a limit of attachment. For example, the user assigned with this Role is not allowed to send files larger than 5024KB

Has permission to create new conference: The role has the permission to start a conference chat.

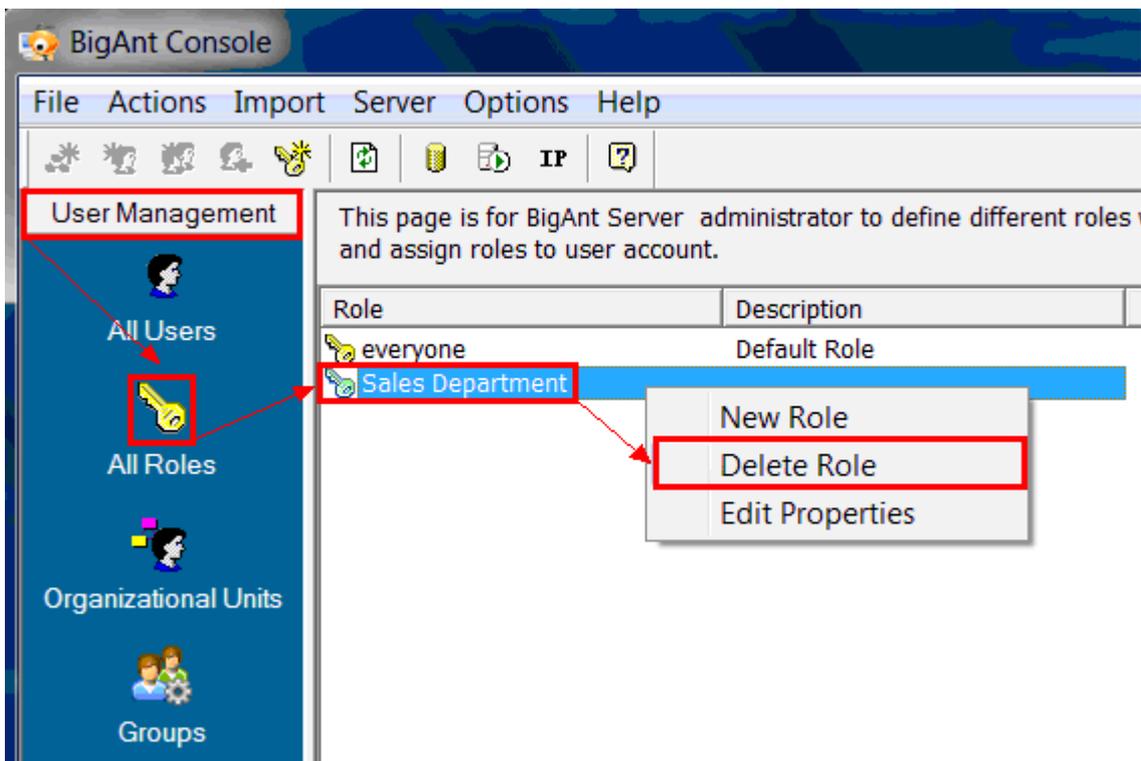

OU Permissions: If there are more than one Organizational Units in your company. You can specify which OU is allowed to be viewed by users with this Role.

The option **Enable Organizational Unit permissions when assign a Role to user accounts** in **Advanced Settings / System Manager** should be enabled already.

Delete an existing Role.

Select and right click an existing Role, select **Delete Role** from pop-up menu.

Apply a Role

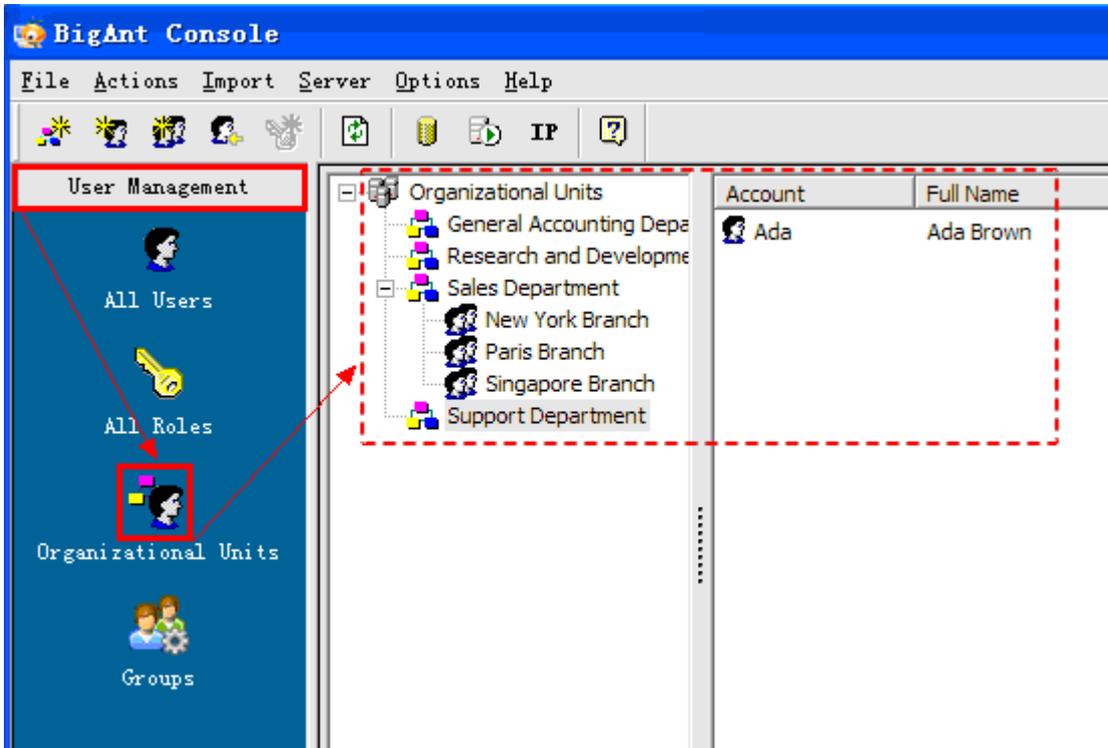

For example, my company has 2 separate branches, we say, B1 and B2, how can I hide users in B1 from being seen by B2 ?

Launch BigAnt Server Console, click Advanced Settings > System Manager, please make sure the option Enable OU permissions when assign a role to users accounts is checked.

1. Launch BigAnt Server Console, click User Management tab on the left and select Organizational Units (OU for short), On the right page will appear an OU tree.
2. Create 2 OUs, for example, one is called OU1 and the other is OU2.
3. Create user accounts for B1 in OU1, create user accounts for B2 in OU2.
4. Click All Roles on the left pane, then double click the everyone role that listed on the right pane to open its properties window. Switch to the OU Permission tab, uncheck the box next to OU1 and OU2. Click OK to exit.
5. Return to the right pane, right click and select New Role from pop-up menu. A New Role window will open, enter the role name like B1, then switch to the Member tab, click the plus button to add all the accounts in OU1, click OK to exit. Switch to the OU Permission tab, please check the box next to OU1. Click OK to exit.
6. Create another new role enter the role name like B2, then switch to the Member tab, click the plus button to add all the accounts in OU2, click OK to exit. Switch to the OU Permission tab, please check the box next to OU2. Click OK to exit.
7. So all users from B1 and B2 branches can logon on the same server but can not see each other on their contact list.

Organizational units

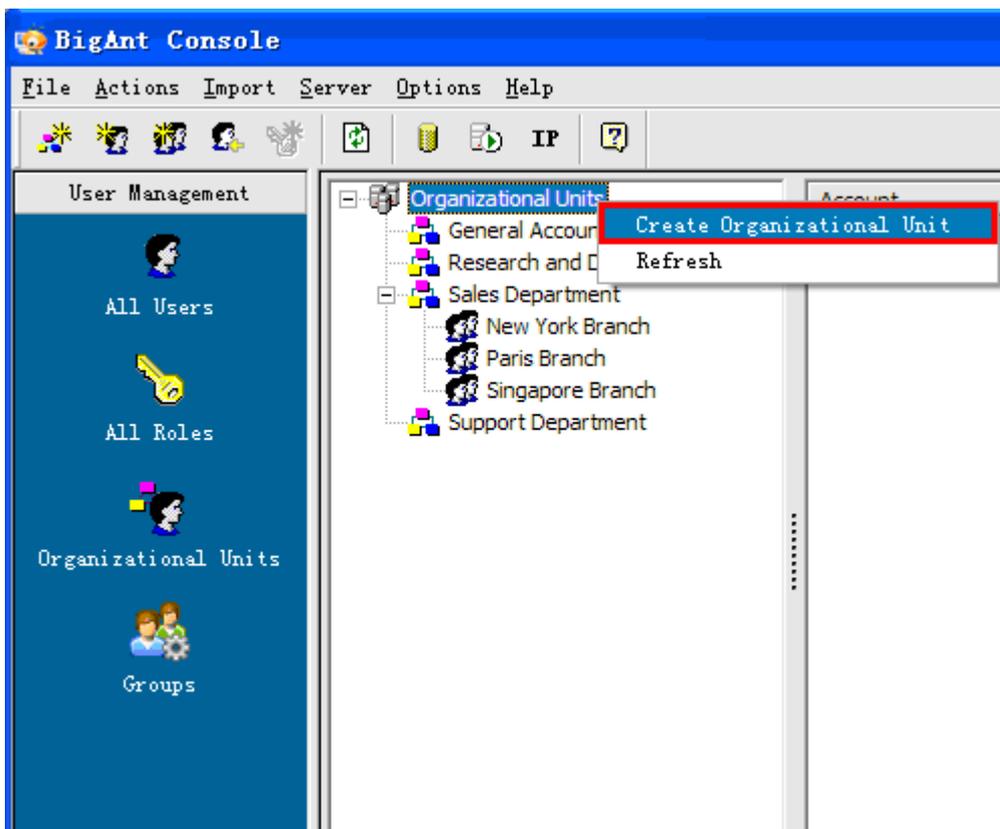

To switch to the Organizational Unit view, just select **Organizational Units** from the **User Management** on the left pane. The result pane displays the list of users located in the Organizational Unit and the list of contacts.

Creating a new Organizational Unit

To create a new Organizational Unit, select and right-click the default Organizational Unit item on the right pane, select **Create a new Organizational Unit** from the pop-up menu.

You can also select the **Actions/New Organizational Unit** from the main menu or use the  button on the toolbar.

Enter an Organizational Unit name and description.

By default, the Organizational Units will be displayed in alphabetical order on BigAnt IM Client window.

If you would like to manually adjust display sequence of Organizational Unit, please enter a number to specify.

For example, you would like to show Paris Branch under Singapore Branch.

Please enter the number 2 for Paris Branch in its **Organizational Unit Properties** window, and enter number 1 in for Singapore Branch in its own **Organizational Unit Properties** window.

Edit an existing Organizational Unit

To edit an existing Organizational Unit, select and right-click it in the existing Organizational Units and select the **Properties** menu item from the pop-up menu.

Delete an existing Organizational Unit

To delete an existing Organizational Unit, select and right-click it in the Organizational Units and select the **Delete** menu item from the pop-up menu.

Delete Organizational Unit: Only the **Organizational Unit** will be deleted. The groups and user accounts belong to this OU will be disabled and moved to the **All Users** item.

Delete Organizational Unit and its members: All groups and user accounts belong to this OU will be deleted from the server as well.

User Accounts

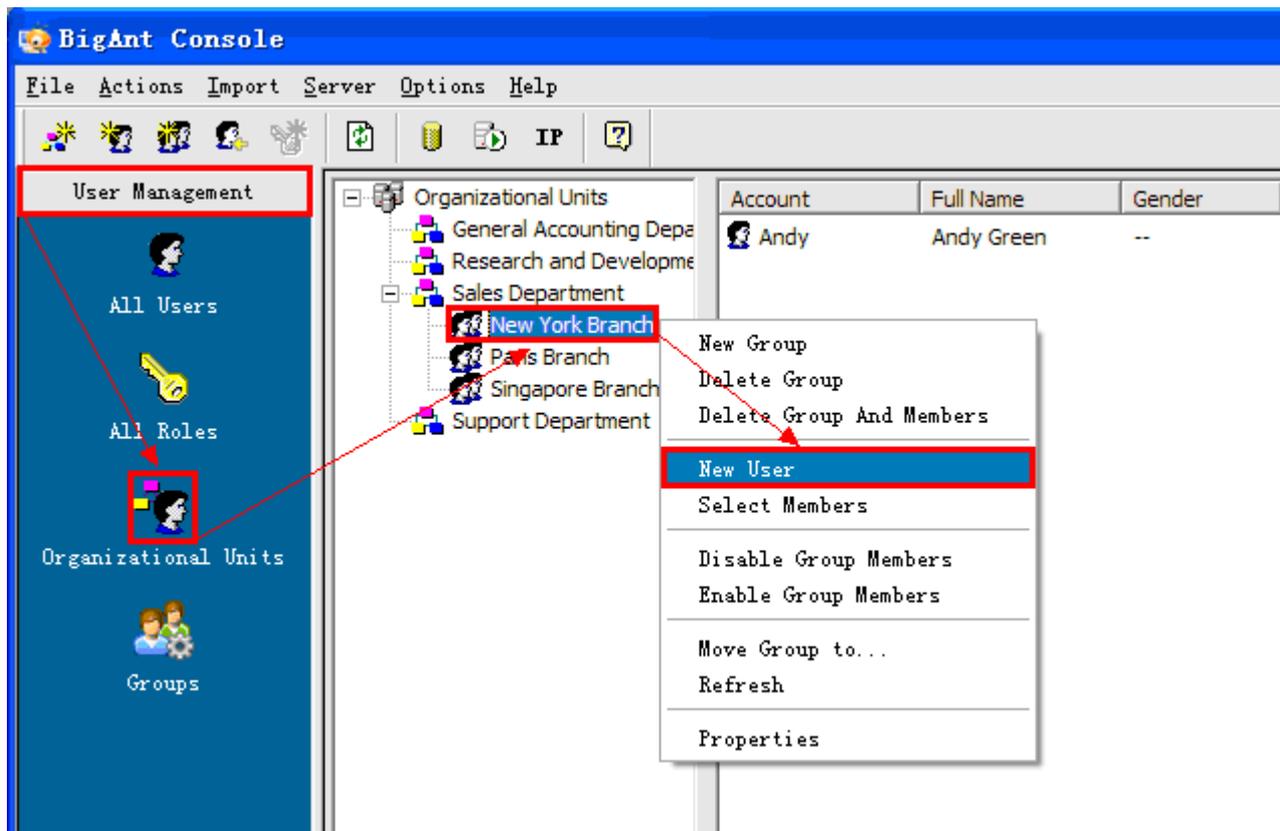

A User Account is an account associated with a user login name used by the BigAnt Messenger client to establish connection with the BigAnt Messenger server and communicate with other users. A User Account can be added manually from the User Management or imported from the Active Directory (LDAP) catalog.

The User Account can be edited, moved, blocked or deleted on BigAnt Server by Administrator.

Add a new User Account

To create a new User Account on the server, right click an existing group and select **New User** from the pop-up menu or right click on the right blank space, select **New User**.

Or click  on the toolbar. This will open the Add User Account Page.

General Information

Use the General information page to enter the user's IM Account (login name), Full Name and password.

Create User

General Business Personal Other

IM Account:

Full Name:

Password:

Sequence No.:

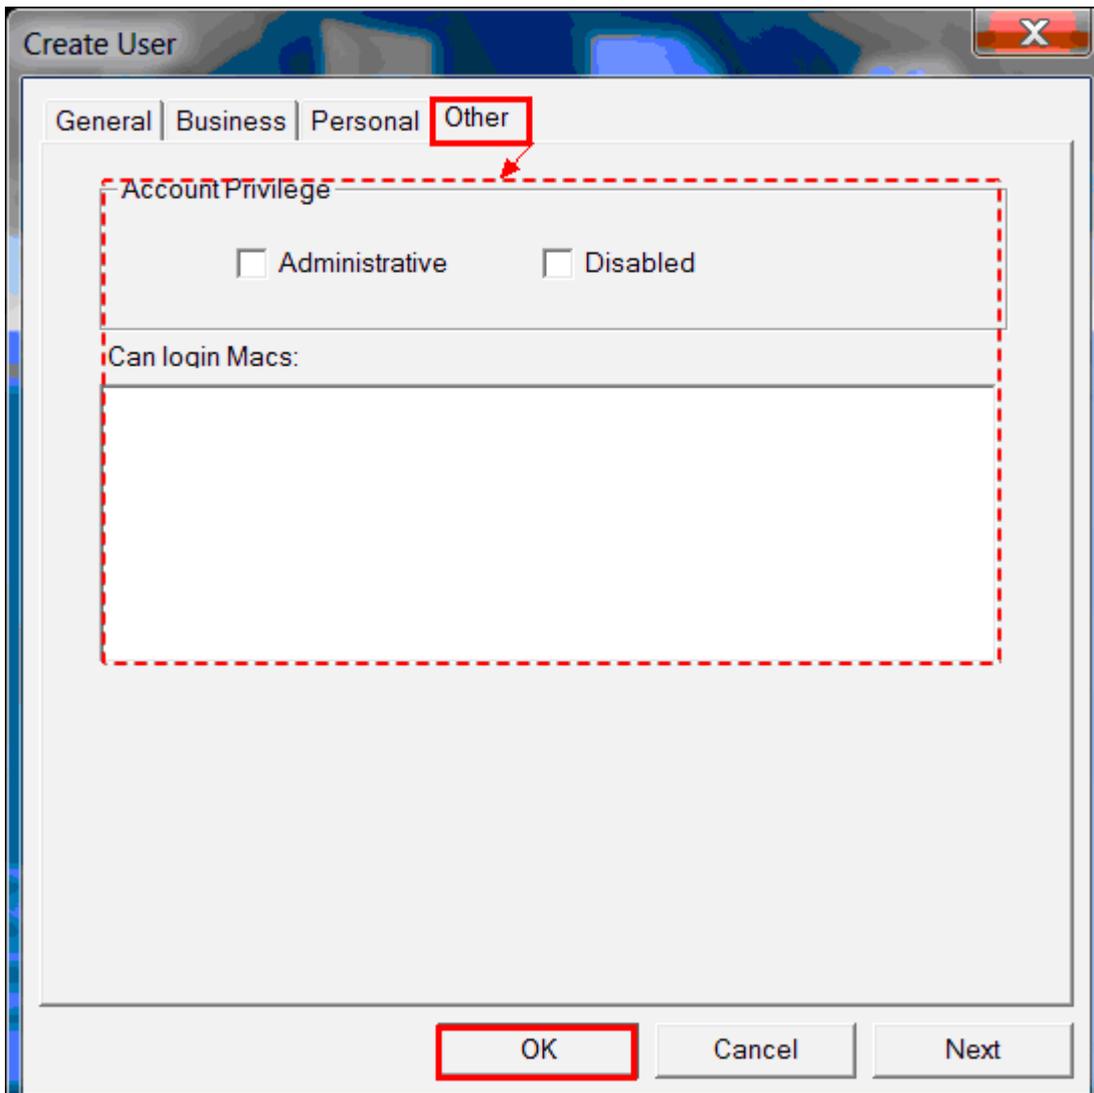

User accounts will be displayed in alphabetical order on BigAnt IM Client window by default. To manually adjust display sequence for user accounts, please enter a number to specify.

For example. To show Ada Pat under Bill Smith. Please enter the number 2 for Ada Pat, and enter number 1 for Bill Smith.

Switch to other 3 tabs to enter optional and additional information about the account, such as title, contact details, account permissions etc.

Administrative account: Enable this option to grant the user administrative privileges on the IM server. Administrators have the right to view and send messages to all users and Messaging Groups located on the IM server and also send bulletin messages.

Disable: Check this option to block the user to log into the IM network and communicate with others.

Edit an existing User Account

To edit an existing User Account on the server, select and right click a User Account, select **Edit Properties** from the pop up menu. This will open the Add User Account Page again. After you edit user account, click OK to save changes.

Delete an existing User Accounts

To delete an existing User Account, select and right click a User Account, select **Delete** from the pop up menu. You should confirm the deletion of a User Account.

You can delete multiple accounts at one time. Press and hold Ctrl key to select several accounts on the Organizational Unit view.

Remove an existing User Accounts

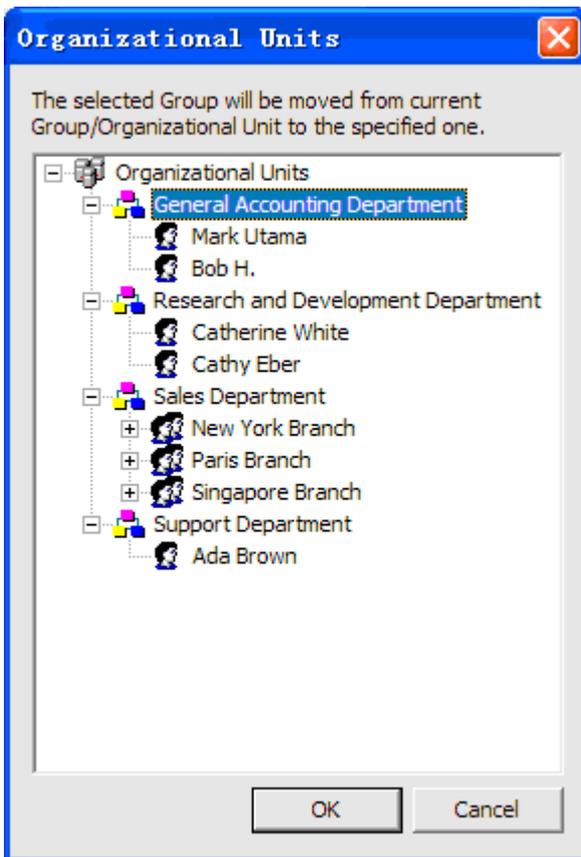

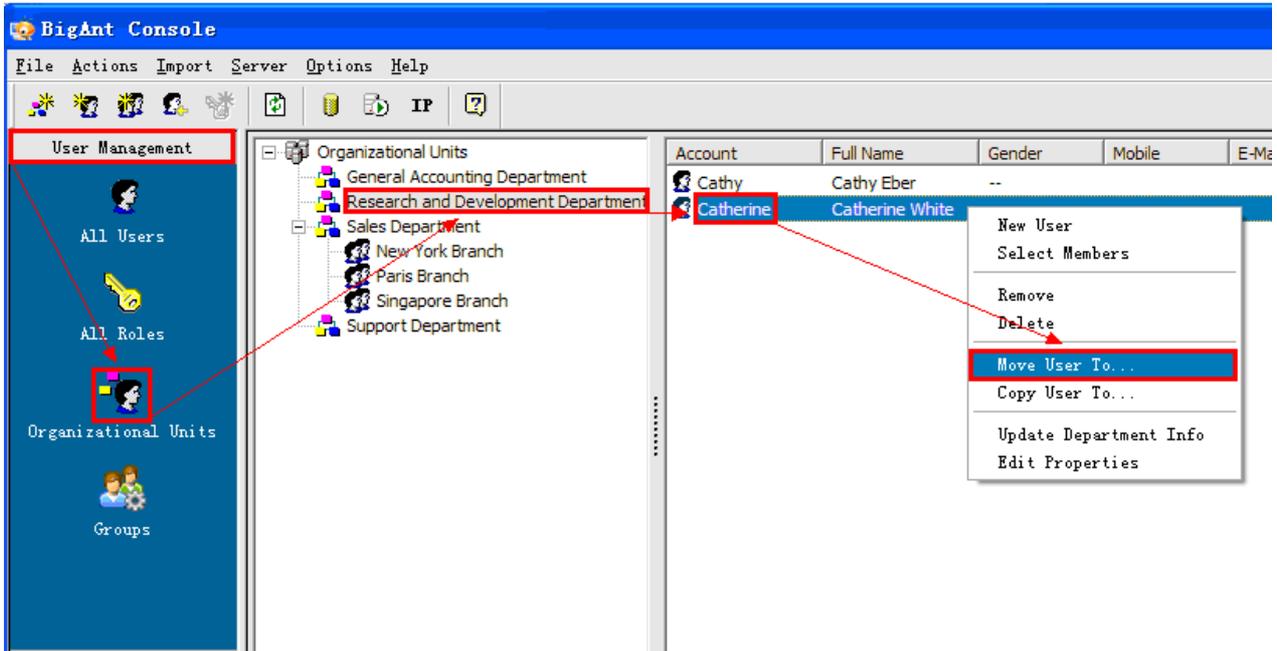

The existing User Account can be removed from current group. Different to permanently delete user account on server, the removed User Account will be stored in **All Users** item. You can find the user account record if you need in future.

To remove an existing User Account, select and right click a User Account, select **Remove** from the pop up menu.

Move an existing User Accounts .

The existing user accounts can be moved to another group or branch. Select and right click an existing user account,

select **Move user to** from the pop-up menu. It will open the Select location dialog box.

You can move multiple accounts at one time. Press and hold Ctrl key to select several accounts on the Organizational Unit view. After you select a new location for the user account, click the OK button to move it. The User Account will be placed to the new location.

Copy an existing User Accounts

The existing user accounts can be copied to another group or branch. Select and right click an existing user account, select **Copy user to** from the pop-up menu.

It will open the Organizational Unit dialog box.

You can copy multiple accounts at one time. Press Ctrl key to select several accounts on the Organizational Unit view. After you select a new location for the user account, click the OK button to move it. The User Account will be placed to the new location and also stays at its original location.

Import Users

The BigAnt Server Console allows you to import user accounts in three ways.

1. **Import User Accounts from file.**

If you have created a .txt(Notepad) file includes user accounts and user name following the format as below.You can click **Import / Import User Accounts from file**,select the .txt file to import all the user accounts from the .txt file to BigAnt Server.

2. **Import User Accounts from file.**

The BigAnt Server Console has the Active Directory Import Wizard that allows you to import user accounts from the Active Directory (LDAP) catalog by Organizational Units or/and Groups criteria. It is easy to create a user database in a few minutes if your business/corporate network is based on the Windows Domain structure.

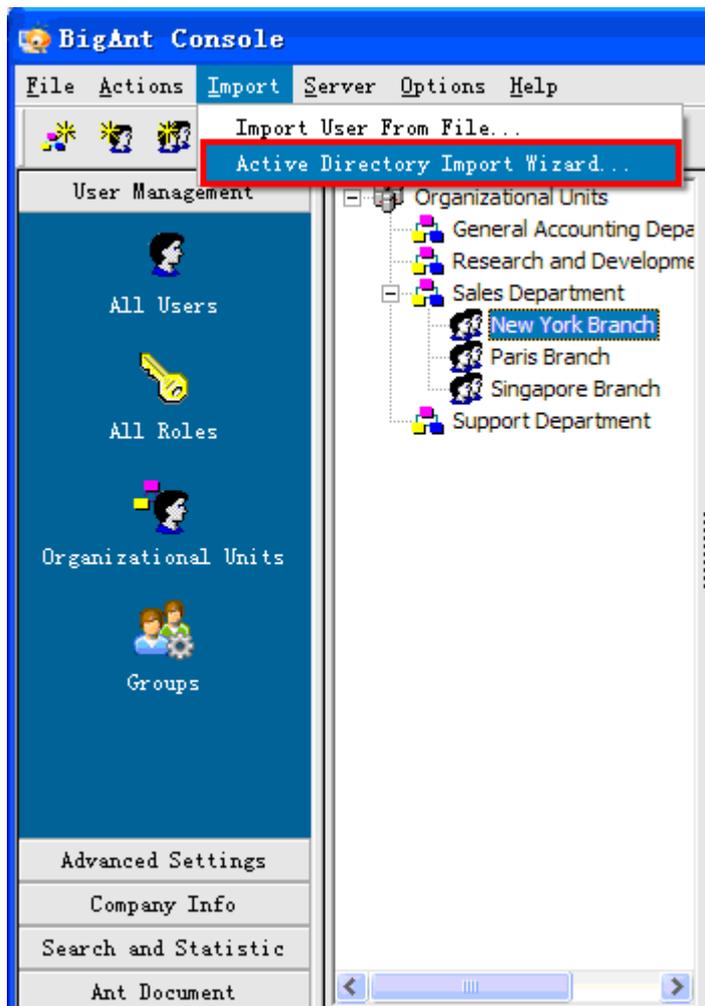

Import User Accounts from the Active Directory (LDAP)

The BigAnt Server Console has the Active Directory Import Wizard that allows you to import user accounts from the Active Directory (LDAP) catalog by Organizational Units or/and Groups criteria. It is easy to create a user database in a few minutes if your business/corporate network is based on the Windows Domain structure.

Import User Accounts from Active Directory

The BigAnt Server Console has the Active Directory Import Wizard that allows you to import user accounts from the Active Directory (LDAP) catalog by Organizational Units or/and Groups criteria. It is easy to create a user database in a few clicks if your business/corporate network is based on the Windows Domain structure.

Select **Import / Active Directory Import Wizard** from menu to open Active Directory Import Wizard.

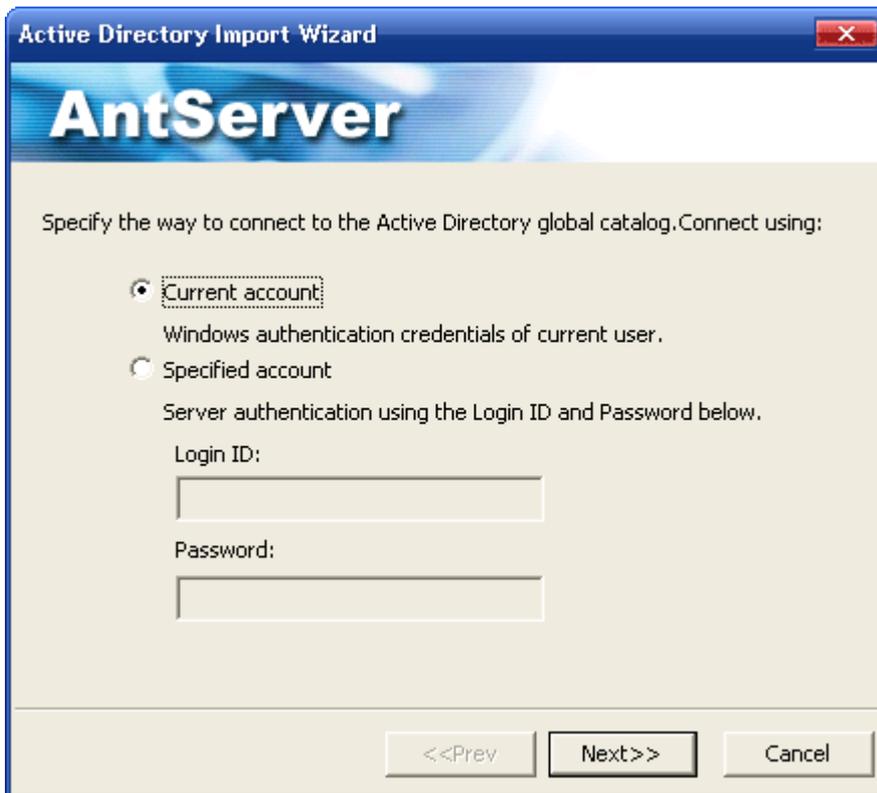

Use current account or specify the user name and password to access the Active Directory catalog.

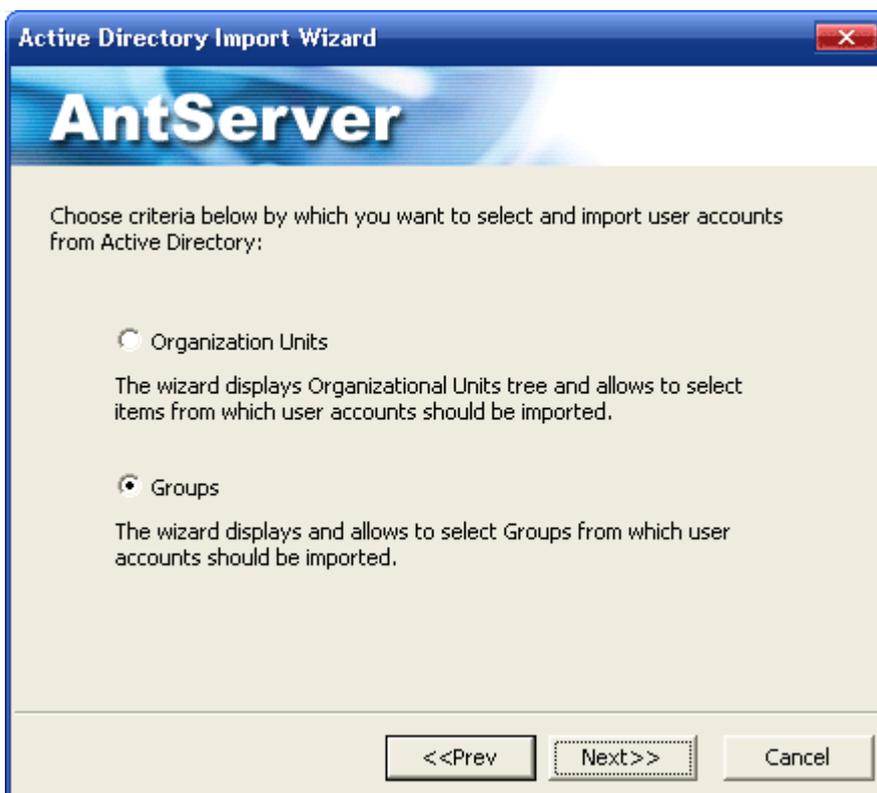

Current account: Select this option if you are logged into the Domain network and your account has the appropriate rights to connect to the Active Directory catalog and enumerate containers and users.

Specified account: Otherwise you can select this option and enter the login ID and password that should be used to connect to the catalog and import user accounts from it.

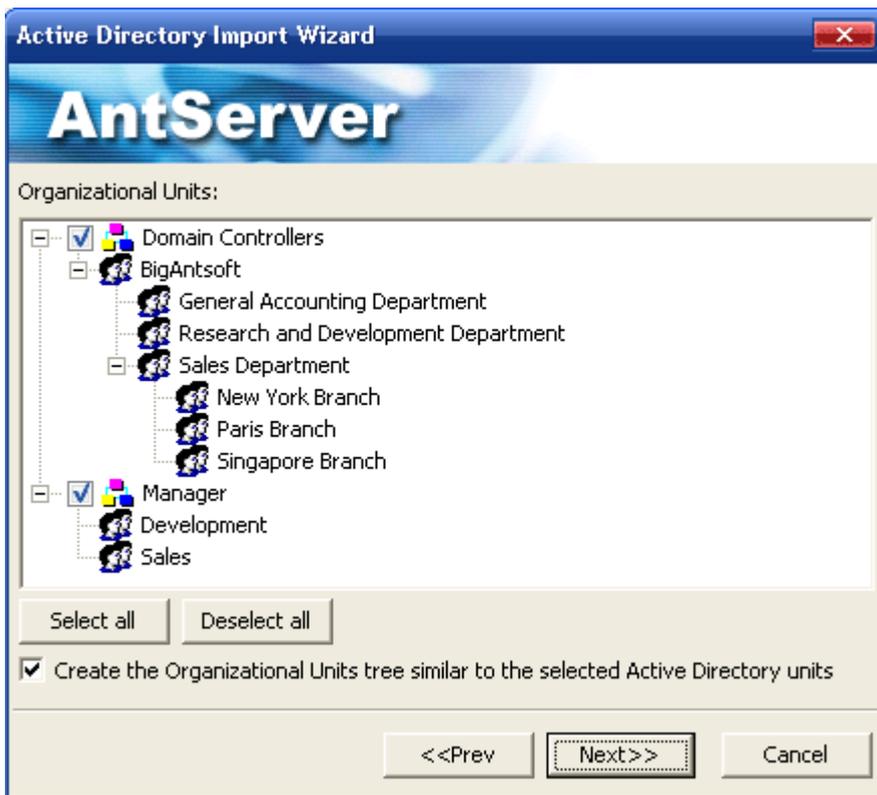

Click **Next** to proceed to continue.

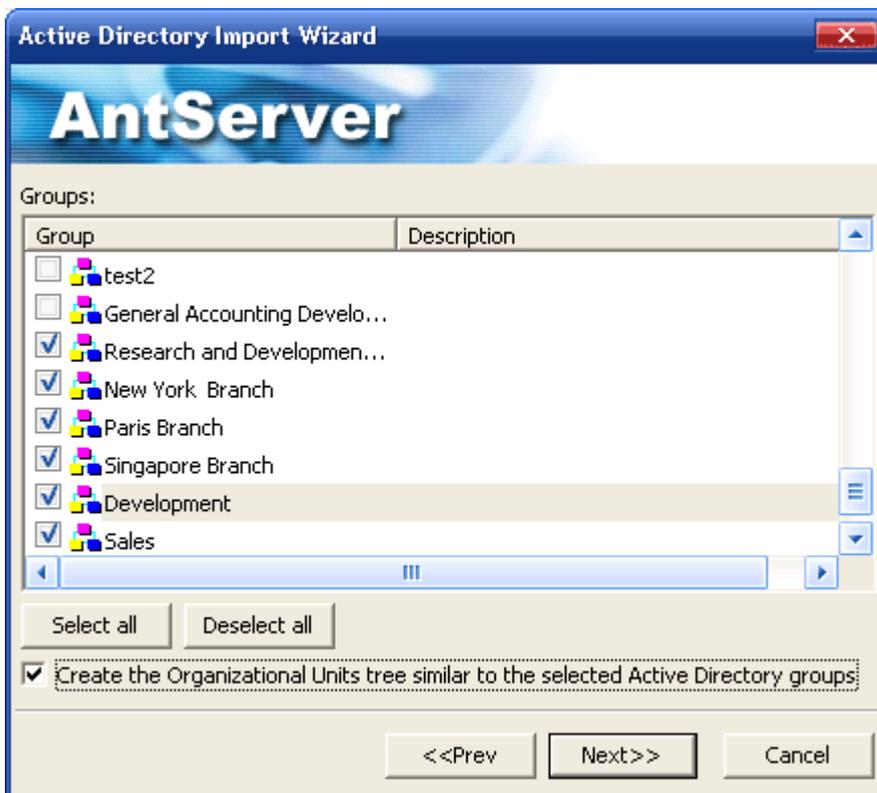

Depending on the options selected, the next page displays either the Organizational Units tree or the Groups list.

Organizational Units: Select this option to display the Organizational Units tree available in the Active Directory catalog. Then you can select only those OUs in the tree you want to import user accounts from.

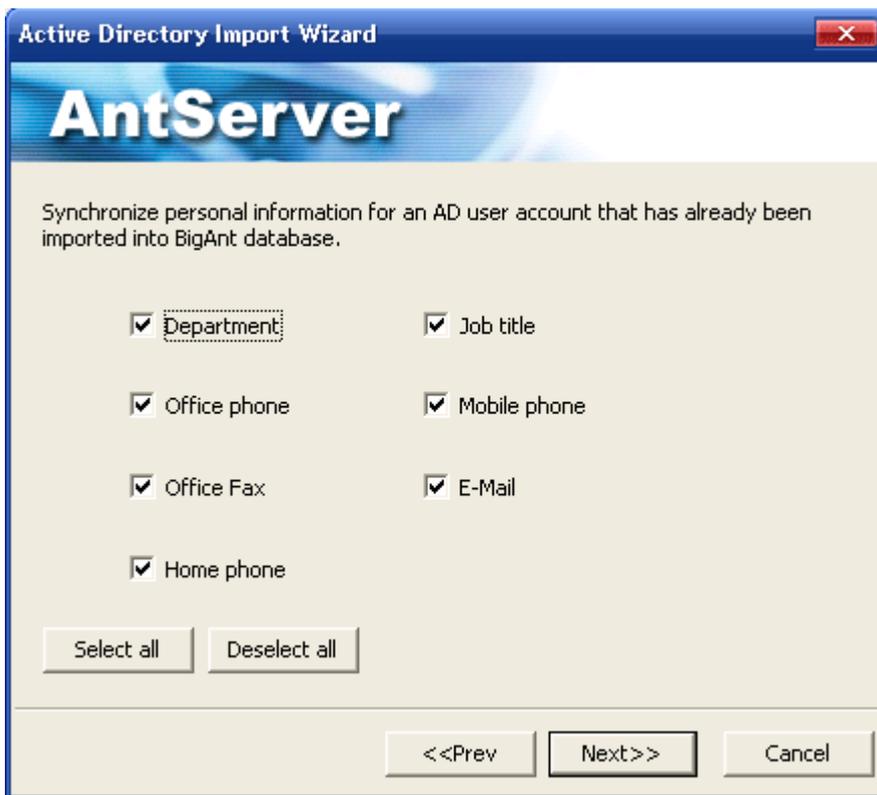

Groups: Select this option to display the list of available Groups in your LDAP catalog. Then you can select only those Groups you want to import users from.

Select the criteria you want to import user accounts by.

Click **Next** to start import.

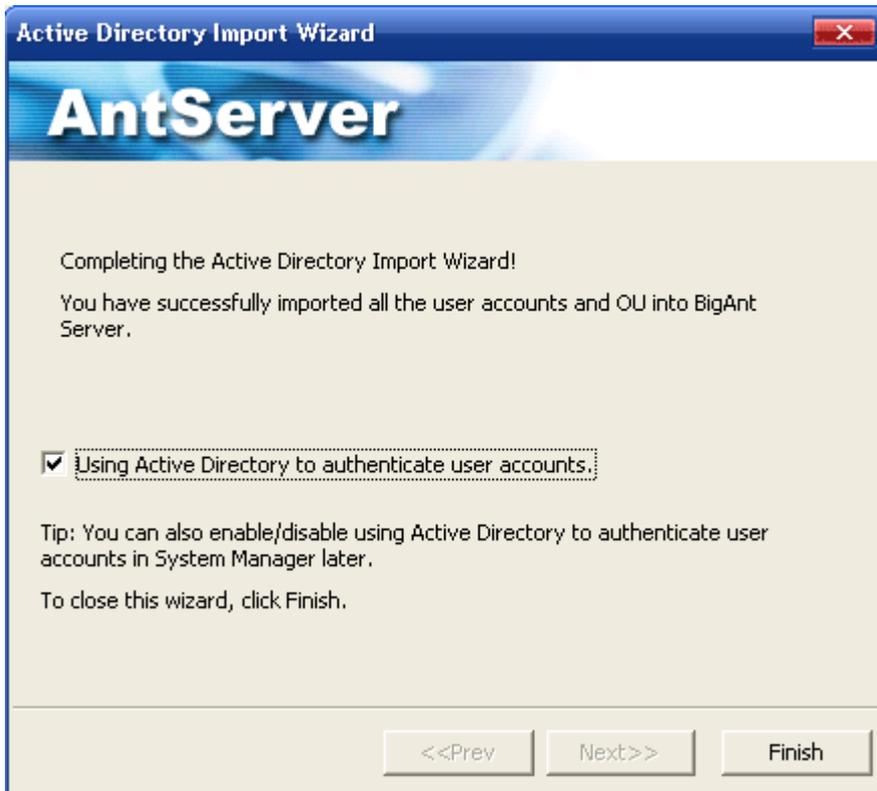

Start importing user profile from AD to BigAnt console.

After you complete the Active Directory Import Wizard selection, you can check the option of **Using AD to authenticate user accounts**.

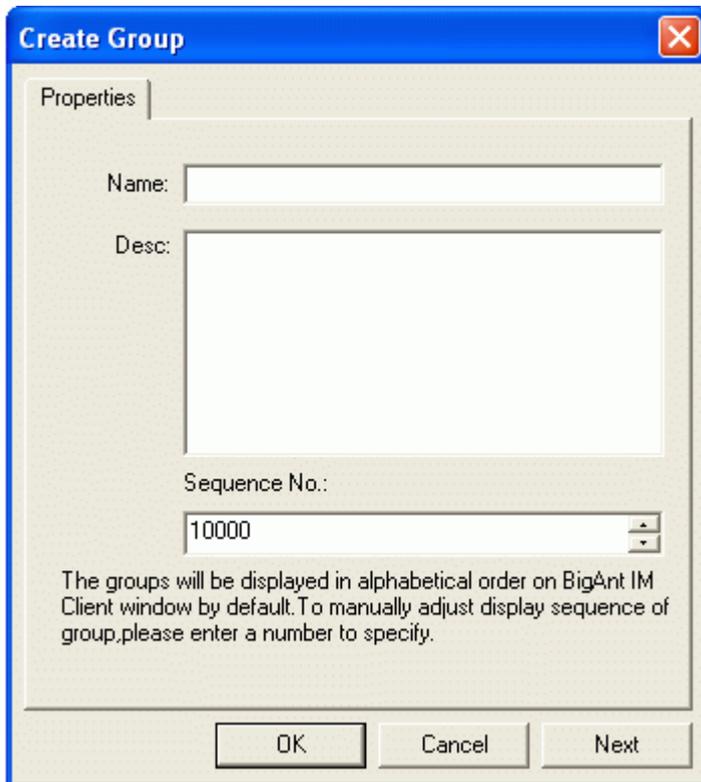

Click **Finish** to exit.

Group Manger

Create a new group

To create a new group, select and right-click an existing Organizational Unit item, select **New Group** menu item from the pop-up menu. You can also select the **Actions\New Group** from the main menu or use the  button on the toolbar. Enter a group name and description.

The image shows a 'Create Group' dialog box with a blue title bar and a close button. It contains a 'Properties' tab, a 'Name:' text box, a 'Desc:' text area, and a 'Sequence No.:' spinner box with the value '10000'. A note at the bottom explains that groups are displayed in alphabetical order by default and that a sequence number can be entered to manually adjust the display order. At the bottom are 'OK', 'Cancel', and 'Next' buttons.

Create Group

Properties

Name:

Desc:

Sequence No.:

The groups will be displayed in alphabetical order on BigAnt IM Client window by default. To manually adjust display sequence of group, please enter a number to specify.

OK Cancel Next

Delete an existing group

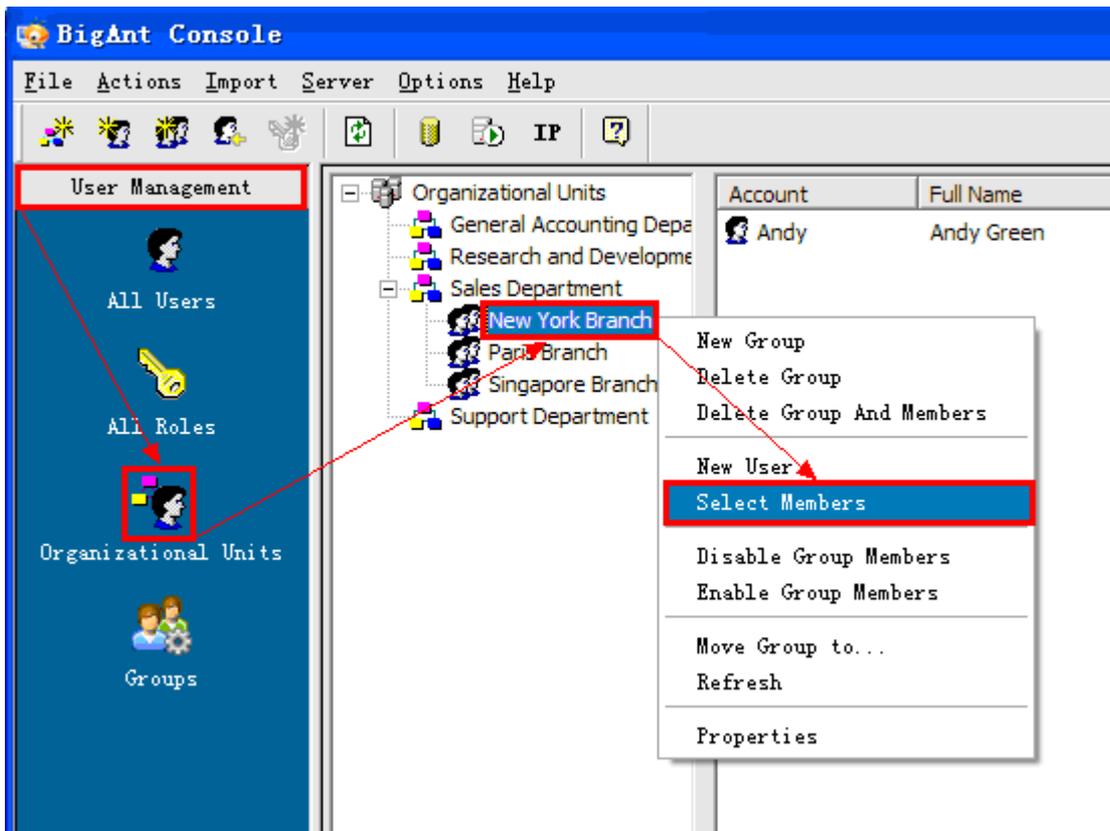

Right-click an existing Organizational Unit. Select **Delete**

Delete Group: Only the Group will be deleted. The user accounts belong to this Group will be disabled and moved to the All user list

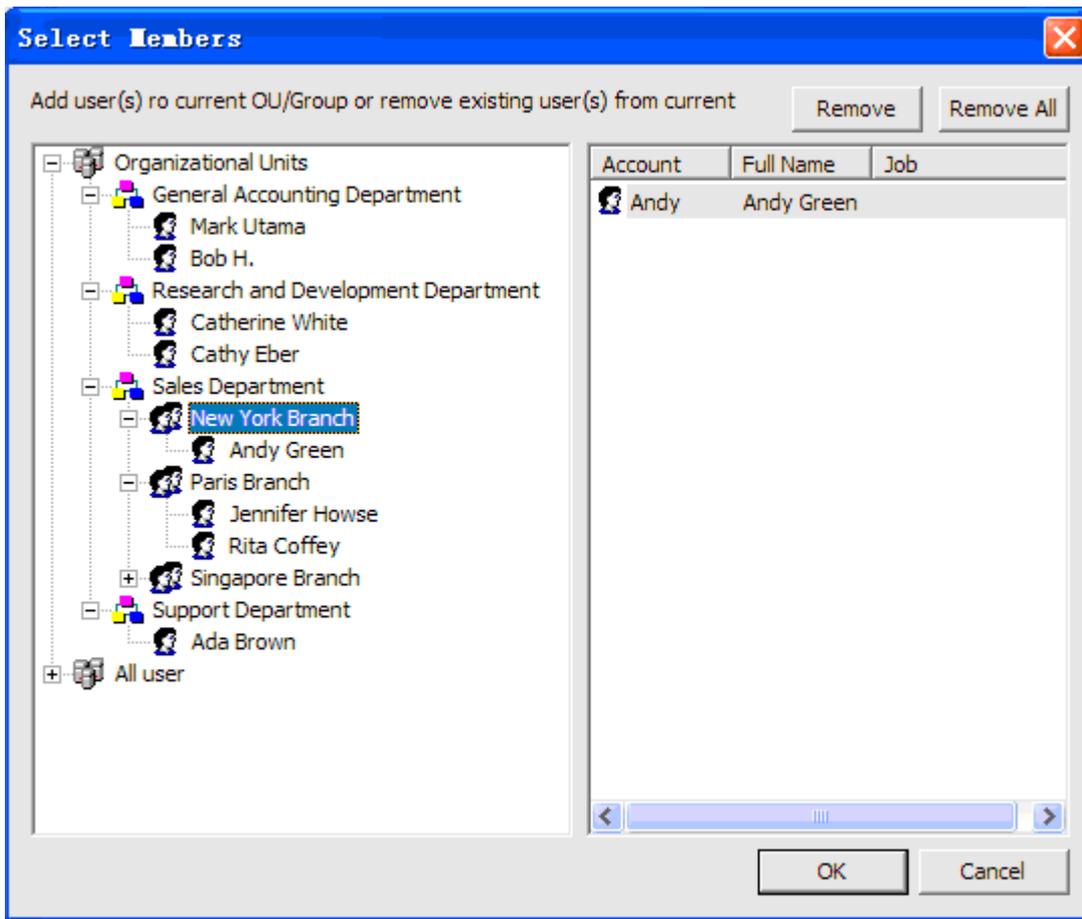

Delete Group and members: The group and user accounts belong to this group will be deleted from the server as well.

Select user account for an existing group

Select and right click an existing group, click **Select members** to open Selection page,

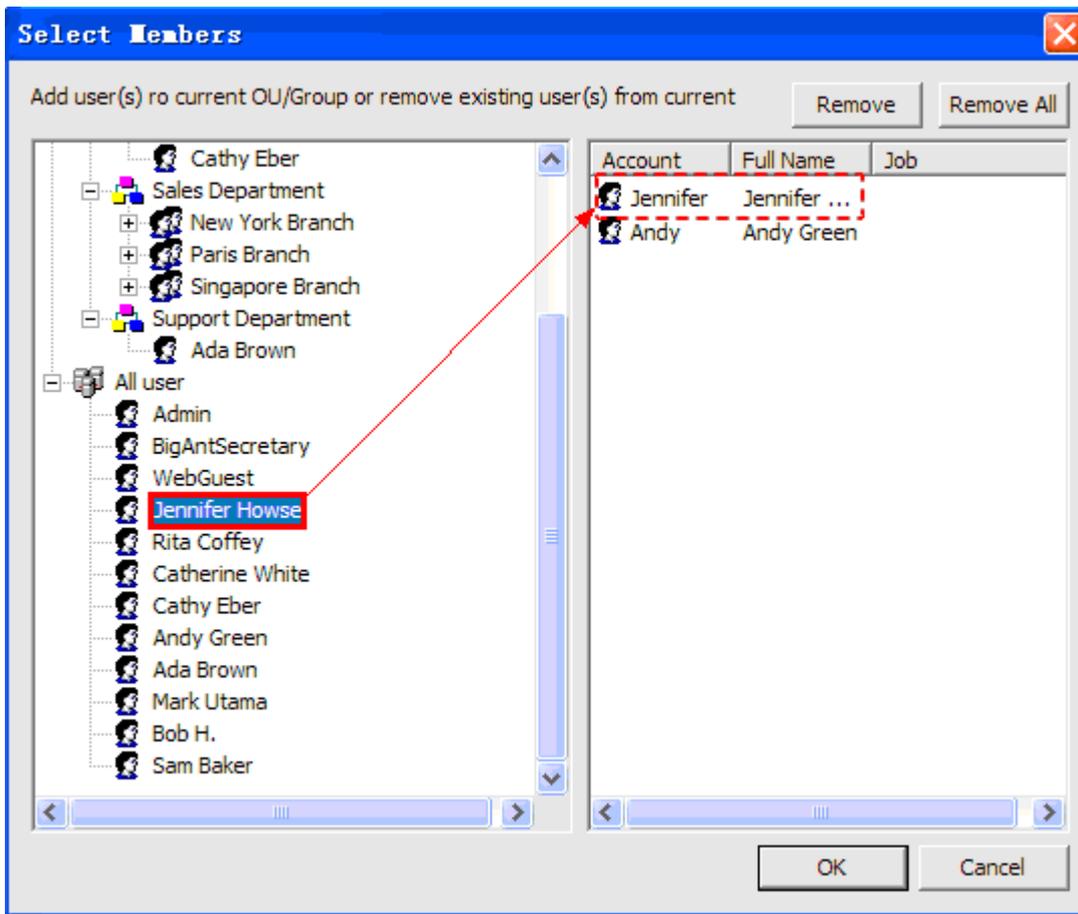

The left window display all available user accounts in the current OU, The right window display the user account in the current group.

Add User Accounts to an existing group

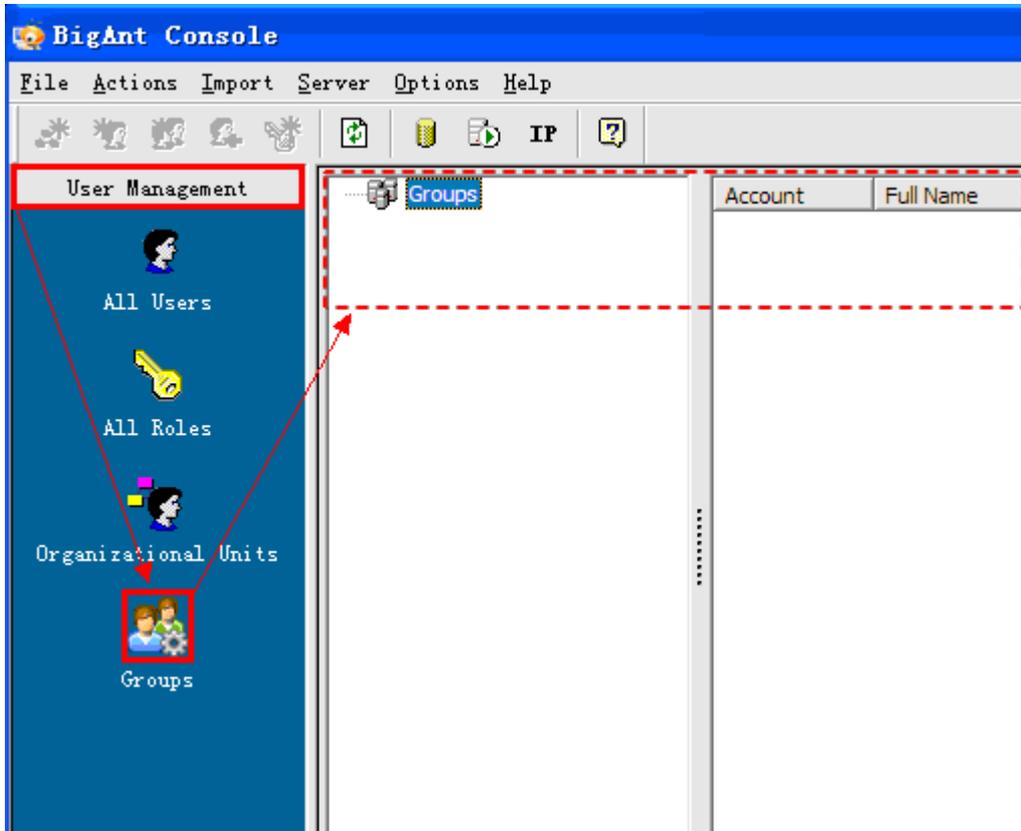

Choose the specified group, select a user from the left window, double clicks to move selected user to the right window. You can remove users, just click the remove button on the right panel.

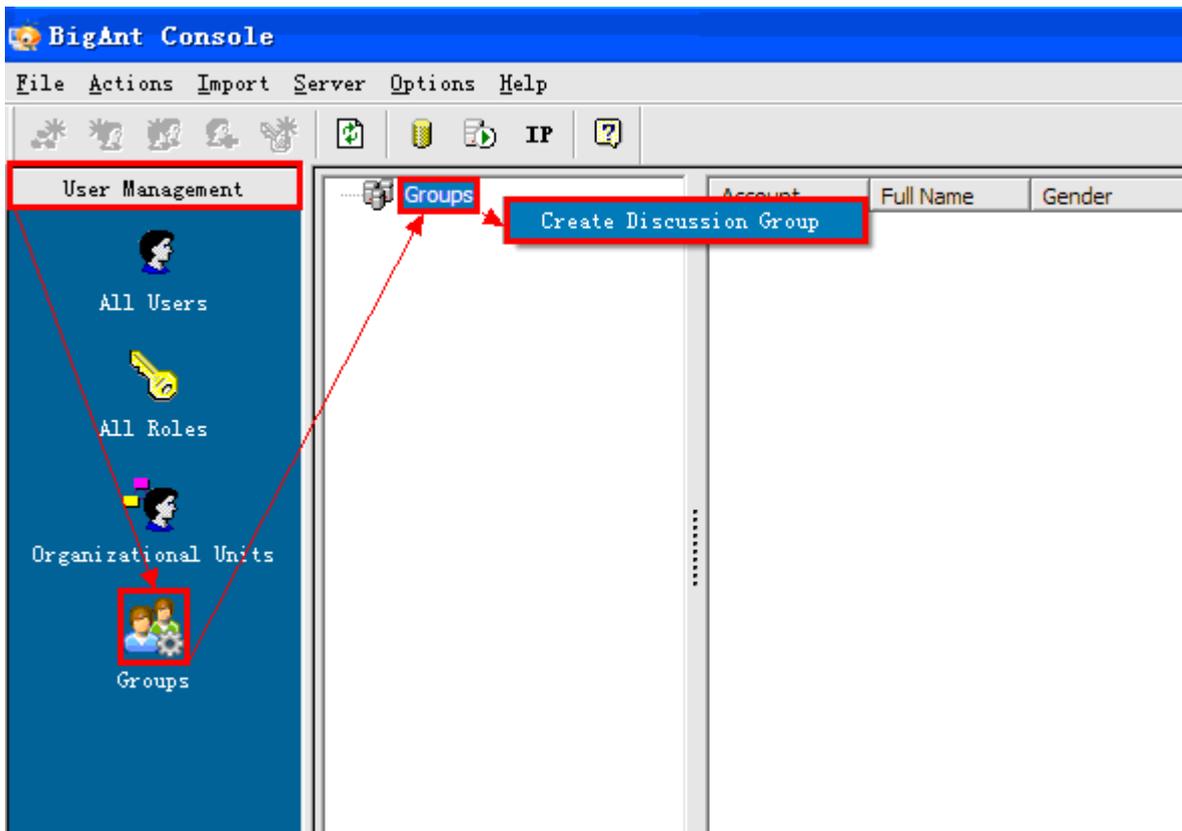

Groups

Create a new group discussion

Get Started

Switch to BigAnt Live chat option

* Click **Company Info** on the left pane, then select **Live Chat**.

*Before start using BigAnt Live Chat, please check if there is a default account called **Ant_Guest_Web** has listed in the **All users** pane, if not, please create the account manually and leave the password as empty.

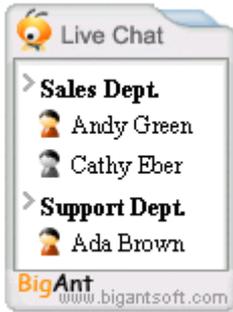

If it is your first time to download and install BigAnt messenger, the Ant_Guest_Web account will be created automatically, but if you have installed the BigAnt messenger before and already created a few user accounts, you need to add the Ant_Guest_Web account manually.

Overview

BigAnt Live Chat allows you to communicate with your website visitors efficiently. Users simply click on the LiveChat icon on your webpage and then they can start the instant messaging with your company on-line support immediately. LiveChat is typically for web customer service.

There are 3 styles of Live Chat shortcut in your webpage. Shown as follows.

Style 1:Operators List

Style 2:Show Live Chat Icon

Style 3:HyperLink

LiveChat:

[HelpDesk](#)

How does BigAnt Live Chat work?

1. Install BigAnt Messenger Server Console on your company server machine.
2. The Administrator specifies operators from existed user account on BigAnt Messenger Server side. Get the auto-generated HTML code and insert to your webpage to create a live chat banner.
3. The operators has BigAnt Client program installed on their computer.
4. When web visitors click the live chat banner, a private chat window will open. Meanwhile the operator will receive an instant note on his/her PC system tray. He/she click on the note to pop-up the chat window and start conversation with web visitors.

Benefits

- Increase sales
- Reduce phone costs
- Provide and improve support
- Convert visitors to clients

Key Features

1. Host BigAnt Live Chat on your own server.
2. The operators can handle multiple conversations simultaneously
3. Easy integration with your web site. Copy and paste HTML code, it's that easy.
4. Enable real time chat. Pop up a chat request notification at system tray area on operator's local PC.
5. Leave an offline message.
6. No Visitor Log-in or Sign-up required. Start live chat in one click.
7. More than one operator when providing live support.
8. The operators can keep a message history on his local pc.
9. Switch live chat request to desired person.

To communicate with your staff on a public computer with internet connection. No additional program or BigAnt IM program was required. For example, you visit your company website on a public computer on airport, then click the live chat banner to build a connection between an online operator. If you would like to chat with Andy Gales in your company rather than the current operator. The operator can forward your chat request to Andy Gales, so the live chat connection will build between you and Andy Gales.

```

How To Use BigAnt LiveChat

1 Input to attain the data that shows the on-line status of operators

- www.bigantsoft.com: BigAnt server address
- 6660: Default BiAnt IM port is 6660
- Chris,Kenny: To view Chris and Kenny' online status. Add , to separate users accounts

2 How to create and edit the operators' profile?

Click **Company Info** on the left pane, then select Live Chat. And then you can edit operators' profile.

The screenshot shows the BigAnt Console interface with the following elements:

- 2 Choose a Style:** A section with the text "Display operators with:" and three radio button options: "List" (selected), "Icon", and "Text".
- 3 Configure Operator Accounts:** A table with columns: Account *, Full Name *, Department, Job Title, Email, Tel, Mobile, and Photo. The first row contains the text "test" in the Account column and "test user" in the Full Name column. A red dashed box highlights this section.
- 4 Generate Html Code:** A section with a large empty text area for code generation.
- Left Pane:** A navigation menu with "Company Info" highlighted in red. Below it are icons for "Company Name", "Company Logo", "Company Homepage", and "Live Chat".

3 How to make the Live Chat floating on the web page?

- Add style="position:absolute to object style="position:absolute;"
- Add floating script
- Execute floating script JSFX_FloatTopDiv(0,0,'livechat') ;
Parameter?Float:left,Float:up,Float object ID

.....

Configure BigAnt Messenger server IP

Click **Company Info** on the left pane, then select Live Chat. You will be redirected to livechat settings page. Please find the first step **Configure BigAnt Server**. Enter the IM server external public IP for internet access and the Port ID in the fields

The screenshot displays the BigAnt Console interface. On the left, a navigation menu is visible with the following items: User Management, Advanced Settings, Company Info (highlighted with a red box), Company Name, Company Logo, Company Homepage, Live Chat (highlighted with a red box), Search and Statistic, and Ant Document. A red arrow points from the 'Live Chat' menu item to the main content area. The main content area features the BigAnt logo and navigation links (Home, Products, Download). A large blue banner reads 'Get Live Chat Html Code'. Below this, a red dashed box highlights the first step: '1 Configure BigAnt Server'. This step includes two input fields: 'Your BigAnt Server Address:' and 'BigAnt Server Port:' (with the value '6660' entered). The second step, '2 Choose a Style', is partially visible below. The interface also shows a browser window at the bottom with a search bar and navigation buttons. The status bar at the bottom left indicates 'Ready'.

Get Started

1. Specify Operators List from existing user accounts.

The operators are selected from existing BigAnt Messenger user account from server side.

Overview

BigAnt Document Management

BigAnt Document Management is a built-in function of BigAnt Messenger Pro.

It is a creative solution for electronically stores, manages and share business documents. You can easily assign access permissions to documents to ensure maximize security and convenience.

Key Features

1. BigAnt Document Management is a built-in function on BigAnt Messenger Pro.
Each BigAnt Messenger client can view documents or create their own documents directory in BigAnt Messenger document control pane.
2. Electronically stores, manages and share business documents in simple clicks.
3. The system administrator can assign access permissions to company documents to ensure maximize security and convenience. Each BigAnt Messenger client can assign access permissions to their personal documents as well.
4. Fast sharing documents enterprise-wide.
5. Enable rich and flexible actions to manage or share documents. Such as download, update, subscribe, edit etc.
6. Keep track of document version history. Always knowing the editions and locations of concerned document.

Benefits

*Totally integrate with BigAnt Messenger and user friendly.

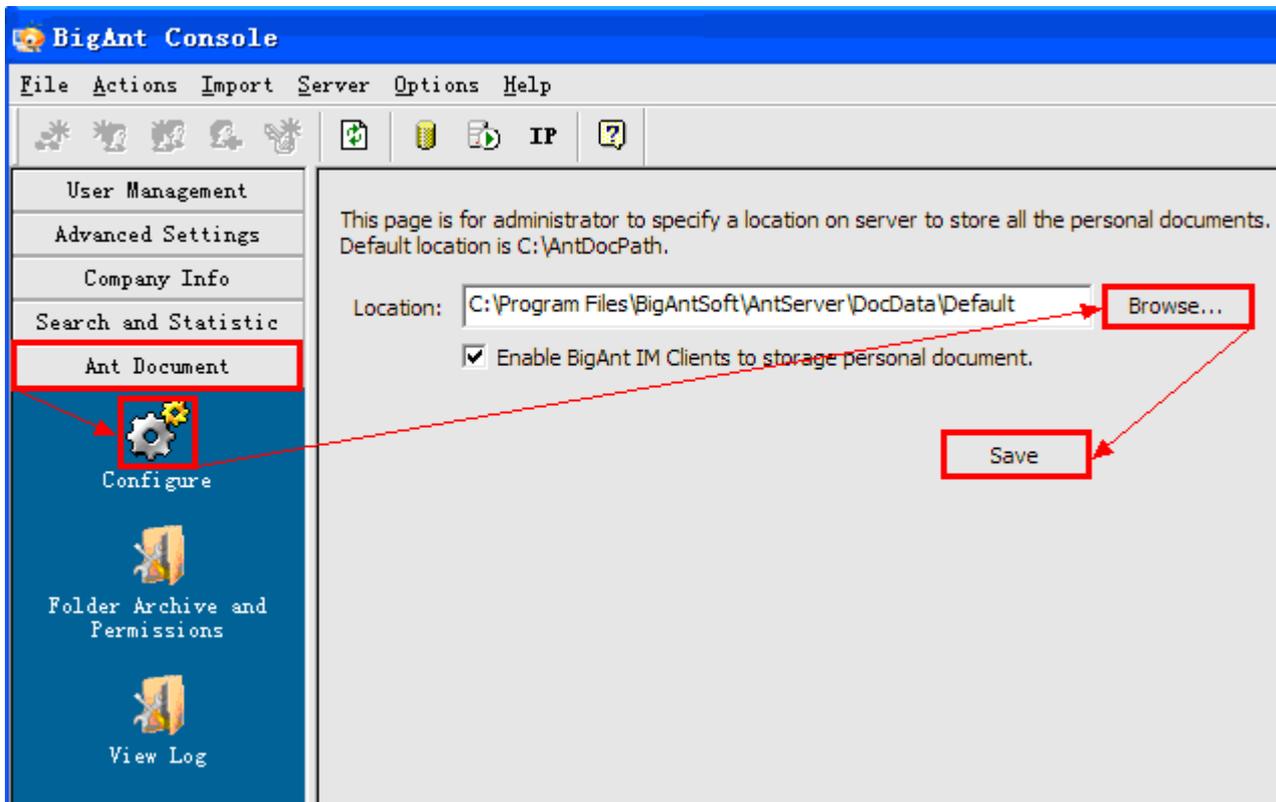

*Improved document management and sharing.

*Store, manage and share documents with clicks.

2.Configure

All the documents and folders uploaded by BigAnt clients will be saved in a dedicated location on server.

Click **Browse** button to choose a location.

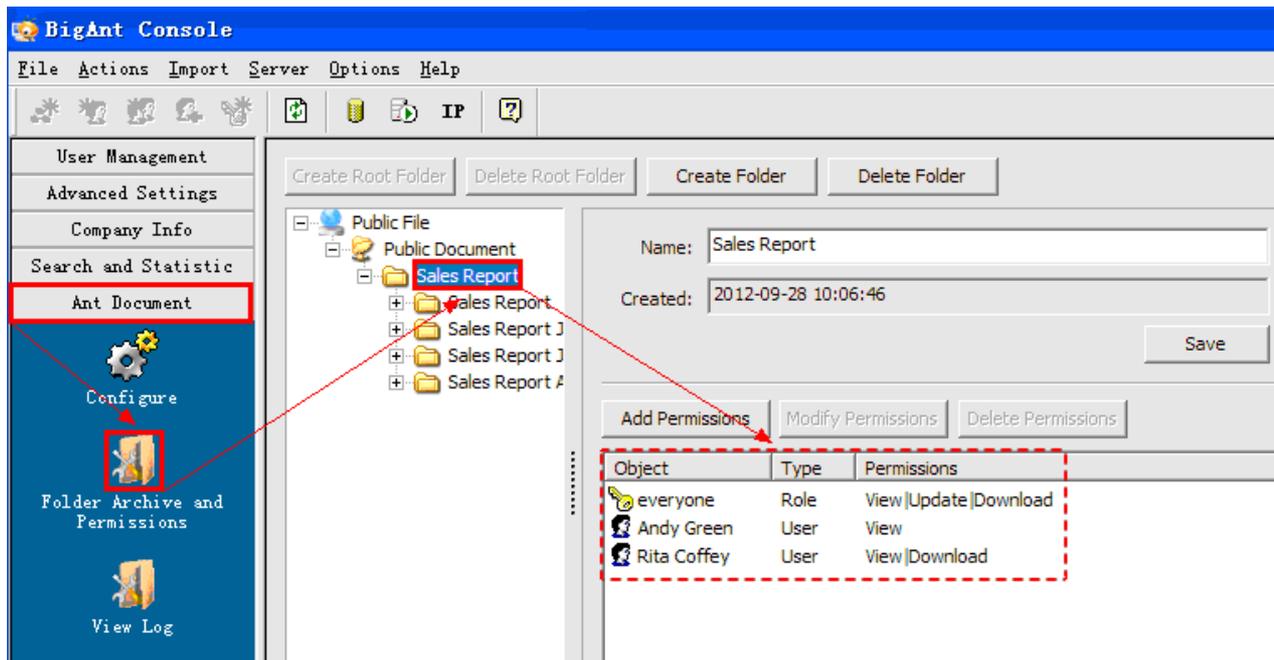

1. Folder Archive

This page is for system administrator to create and maintain folders that will be used to store company documents and assign access permissions based on needs.

The created folder tree will appear on all BigAnt clients side accordingly. The administrator will assign permissions to clients to control access of particular company documents folders.

The left side will show an existed folder tree. Click a folder and the right side will show the detail information of the selected folder.

1) Create Folder

Click **Create Root Folder** to start. The root folder will be listed in the top of the tree. To create a sub-folder under the root folder, please click **Create Folder**.

2) Delete Folder

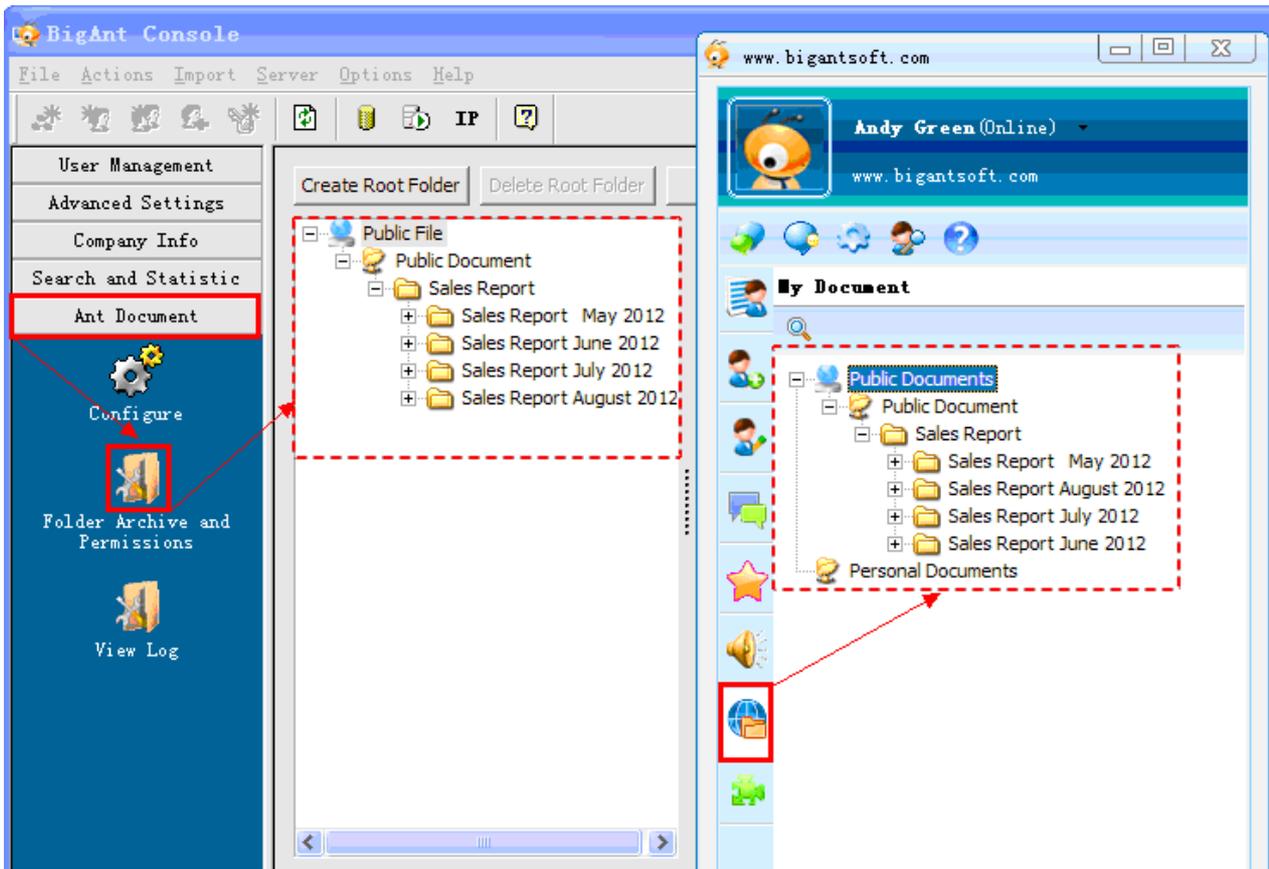

Select a folder and click **Delete Folder** to completely remove the folder from server side and client side as well.

3) View Folder Properties

- **Name:** To show the folder name or rename the folder
- **Location:** To show the location of the folder or specify another location.
- **Created:** Show when the folder has been created.
- **Type:** Show folder level.
- **Track version history:** Check this option will enable BigAnt IM clients to track and view the version history for this folder.
- **Enable subscription:** Check this option will enable BigAnt IM clients to subscribe this folder and inside documents. If there were any update made to the folders and documents, an instant note will be delivered to clients.

Click **Save** button if any changes have been made.

4)The folder tree will appear on all BigAnt Clients side accordingly.

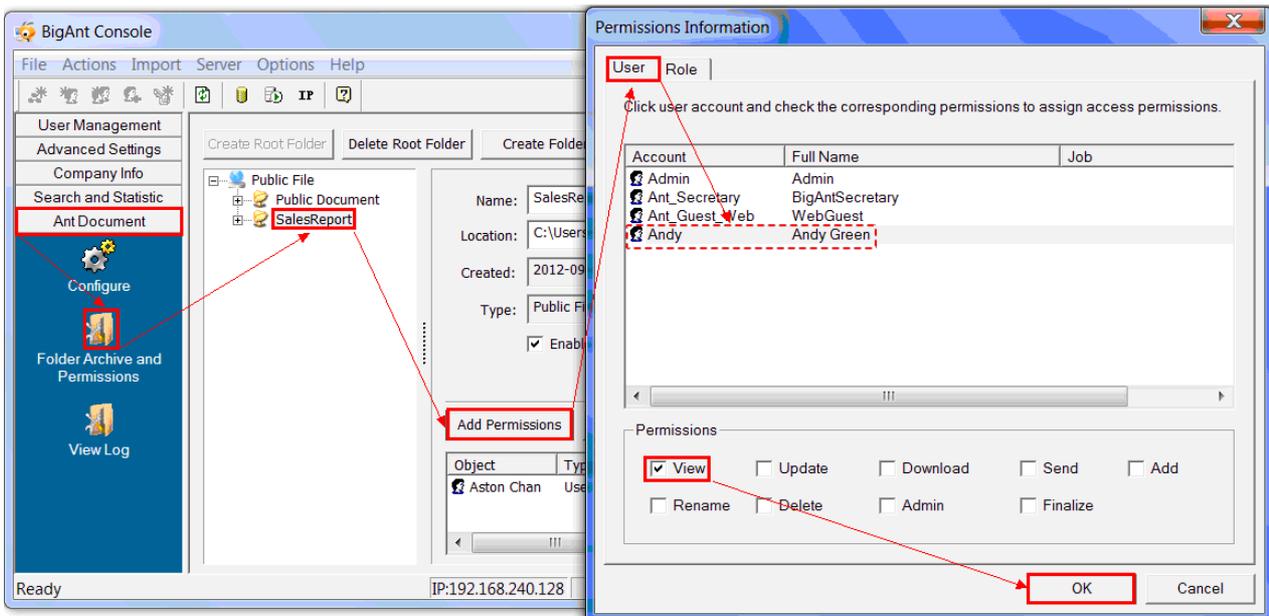

2.Assign access permissions to folders

Click **Add permissions** button to specify access permissions for the selected folder. BigAnt Document Management provides 2 modes for assign permissions.

1) Assign access permissions to folders based on user account.

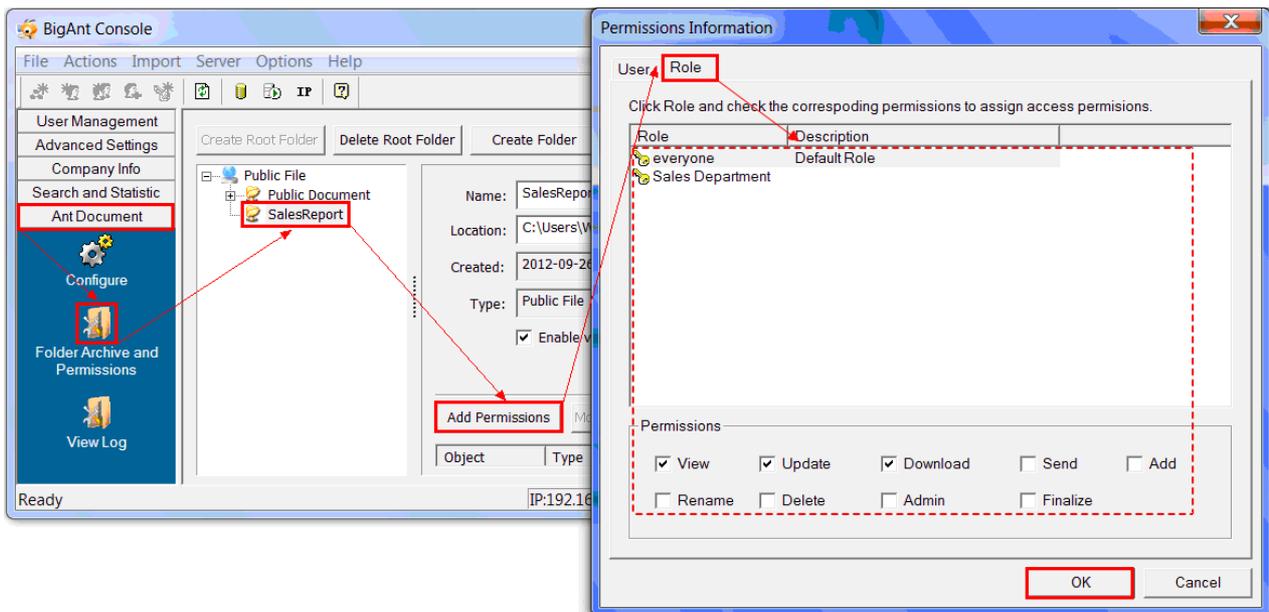

Select an user account, and then place checkmark to the listed permissions. For example, you have checked "View" for Andy Green. This means Andy Green can only open and view the specified folders and content inside, but can not download/update/send/add/rename/delete/admin/finalize those content.

Press and hold Ctrl key to make a multiple user selection.

2) Assign access permissions to folders based on roles.

You need to create a Role first. Specify access permissions to this Role, then apply the Role to multiple members.

3) View access permissions list for a selected folder.

The assigned access permissions for a selected folder will be listed in the window as screenshot below.

Select an object, and click **Modify Permissions** if there was any update;

Select an object, and click **Delete Permissions** to completely remove the specified permissions.

5.View Log

This page is for system administrator to search and view documents log on server side.

The screenshot displays the BigAnt Console interface. The left sidebar contains a menu with the following items: User Management, Advanced Settings, Company Info, Search and Statistic, Ant Document, Configure, Folder Archive and Permissions, and View Log. The 'Ant Document' and 'View Log' items are highlighted with red boxes. A red arrow points from the 'View Log' icon to the search filters in the main panel. The main panel features a search interface with the following elements:

- Search in: Today This week This month Specify
- Date range: 10/11/2012 to 10/11/2012
- Action: Search for All
- Buttons: Search, Clear

Below the search filters is a table with the following columns:

Time	User	Action	Content
------	------	--------	---------

- 7. Comparison between BigAnt IM Standard version and Pro version?**
[Details...](#)
- 8. General features of BigAnt Messenger**
[View demo](#)

Requirements & Installation

- 1. What are the minimum requirements?**
 - BigAnt Messenger client will work in Windows 2000, XP, and Vista.
 - BigAnt Messenger server will work in Windows 2000, XP, Vista, Server 2003
 - CPU: P4 (or higher recommended)
 - Free disk space: 100MB or above
 - RAM: 256MB (or higher recommended)
- 2. How to install BigAnt Messenger?**
[Download](#) BigAnt Messenger Installer from here and save in your computer. Exit all applications for safe install. Recommend to install by Administrator on the computer.
- 3. How to uninstall BigAnt program?**
To remove BigAnt Messenger's program files from your computer, do the following steps:
 - Click Add/Remove Programs icon in Control Panel folder.
 - In the window select BigAnt Messenger and click Add/Remove button.
 - Follow all instructions of the Setup Wizard.
- 4. How to get BigAnt.MSI client program?**
The MSI for IM client is available; please contact info@bigantsoft.com for more information.
- 5. How can I access BigAnt server from Internet?**

If BigAnt Server program was installed on a server machine with internet connection.

If your company use a fixed IP or a domain name. BigAnt Client can login BigAnt Server by input the fixed IP or domain name anywhere anytime, if users have internet connection.

If your company uses ADSL/dial-up for internet connection. Please apply a dynamic domain name from Dynamic DNS (Dynamic Domain Name Server) service provider. Please install and run Dynamic DNS client on BigAnt server machine. BigAnt Client users with internet connection can login BigAnt Server by input the dynamic domain name.

Dynamic DNS (DDNS) allows you to create a hostname that points to your dynamic IP or static IP address or URL. It is recommended to use <http://www.dyndns.com> for your DDNS service. Check it out here: <http://www.dyndns.com/services/dns/dyndns/>

If BigAnt Server was installed on a server machine with intranet connection.

If your company use a shared internet connection through a dial-up computer, and BigAnt Server program was installed on the main machine. Please apply a dynamic domain name from Dynamic DNS service provider. Please install and run Dynamic DNS client on BigAnt server machine. So BigAnt Client users with internet connection can login BigAnt Server by input the Dynamic Domain Name.

If your company uses Router for internet connection. Please point the Port 6660 from Router to the corresponding Port 6660 on the main machine with BigAnt server program installed. Meanwhile install and run Dynamic DNS client on BigAnt server machine. So BigAnt client with internet connection can login BigAnt Server by input the dynamic domain name.
